Informazioni generali

Il valore netto d'inventario per azione di ogni comparto, i prezzi di emissione, di rimborso e di conversione sono pubblicati ogni giorno di valutazione presso la sede sociale della Società in Lussemburgo e del Rappresentante in Svizzera. Inoltre sono oggetto di un'inserzione in Svizzera su www.fundinfo.com.

L'esercizio comincia il 1° gennaio di ogni anno e si chiude il 31 dicembre dello stesso anno

La Società pubblica una relazione annuale dettagliata riguardante la sua attività e la gestione del suo patrimonio, che comprende il bilancio espresso in USD, la composizione dettagliata degli attivi di ogni comparto e la relazione della società di revisione.

Inoltre, essa procede, dopo la fine di ogni semestre, alla pubblicazione di una relazione semestrale non certificata.

L'Assemblea generale annuale degli Azionisti si tiene ogni anno presso la sede sociale della Società, o in qualsiasi altro luogo in Lussemburgo che sarà specificato nell'avviso di convocazione.

L'Assemblea generale annuale degli Azionisti si tiene il terzo giovedì del mese di aprile alle 15.00 o, se quest'ultimo è festivo, il giorno lavorativo bancario seguente

Gli avvisi per tutte le Assemblee generali sono inviati per posta a tutti gli azionisti nominativi al loro indirizzo figurante sul registro degli azionisti, almeno otto giorni prima dell'Assemblea generale.

Questi avvisi indicheranno l'ora e il luogo dell'Assemblea generale, le condizioni di ammissione, l'ordine del giorno e i requisiti previsti dalla legge lussemburghese in materia di quorum e maggioranza necessari. Inoltre, nel caso del Granducato di Lussemburgo e della Svizzera, gli avvisi possono essere pubblicati nel "RESA" e su un giornale lussemburghese (il Luxemburger Wort), nonché sul sito web www.fundinfo.com come anche sulla stampa o su altri media selezionati dal Consiglio di amministrazione o dalla Società di gestione nei paesi in cui il Fondo è commercializzato, e sul sito www.fundsquare.net. I requisiti riguardanti la partecipazione, il quorum e la maggioranza per tutte le Assemblee generali sono quelli fissati dagli articoli 67 e 67-1 (e successive modifiche) della legge del 10 agosto 1915 relativa alle società commerciali nonché dallo Statuto della Società

Eventuali avvisi agli azionisti sono pubblicati sui siti web: www.fundinfo.com e www.fundsquare.net

Relazione del Gestore

Il 2023 ha messo in difficoltà gli analisti di mercato, ma è stato eccezionale per gli investitori. Quasi tutte le principali categorie di attività hanno prodotto rendimenti positivi nel corso dell'anno, nonostante le preoccupazioni per l'inflazione, la recessione e l'impatto dell'aumento dei tassi di interesse che non sono riuscite a frenare i mercati globali. Le banche centrali hanno continuato a irrigidire la politica monetaria nel 2023, guidate dalla Federal Reserve statunitense la quale, dopo aver aumentato i tassi sette volte per complessivi 4,25 punti percentuali nel 2022, ha inasprito la stretta con ulteriori quattro rialzi tra gennaio e luglio. Questi interventi hanno spinto i tassi dei Fed Funds fino al 5,5%, il limite superiore più alto dal 2000.

I mercati azionari globali hanno registrato una forte ripresa nel 2023, smentendo le previsioni pessimiste di fronte a condizioni economiche sempre più restrittive. Nonostante le banche centrali di tutto il mondo continuassero ad aumentare i tassi di interesse per combattere l'inflazione, i mercati azionari sono riusciti a risalire con vigore. L'indice MSCI AC World ha chiuso l'anno con un rialzo del 22,2%, espresso in dollari statunitensi.

L'aumento rapido dei tassi di interesse non è stato privo di conseguenze. Negli Stati Uniti, si sono verificati tre dei quattro maggiori fallimenti bancari della storia, mentre la banca svizzera Credit Suisse è stata costretta a una fusione con la sua principale rivale UBS a distanza di poche settimane l'una dall'altra, a marzo e aprile. Nonostante queste turbolenze e la stagnazione degli utili aziendali a livello di indice per tutto l'anno, i mercati azionari sono saliti grazie al sentiment positivo degli investitori e a una crescita dei multipli di valutazione.

In genere, da condizioni monetarie così restrittive si attenderebbe una penalizzazione dei titoli growth, ossia quelli che tendono a presentare una duration maggiore o a concentrare i profitti più in là nel tempo. Tuttavia, sorprendentemente, gli stili di gestione growth hanno sovraperformato quelli value nel corso dell'anno. A riprova di ciò, l'indice MSCI AC World Growth ha registrato un rendimento del 33,2%, mentre l'indice MSCI AC World Value ha ottenuto un incremento dell'11,8%.

Il singolo fattore che più ha influenzato maggiormente la performance dell'anno è stata la sovraperformance del gruppo dei Magnifici 7, ossia dei titoli delle società statunitensi a maggior capitalizzazione: Apple, Alphabet (Google), Microsoft, Amazon.com, Meta Platforms (Facebook), Tesla e Nvidia. L'indice Bloomberg Magnificent 7 ha registrato un rendimento di oltre il 107% nel 2023, rispetto al 15,4% dell'indice S&P 500 ex-Magnificent 7.

Per i gestori attivi che selezionano singolarmente i titoli azionari, l'elevata concentrazione di performance nelle società a maggiore capitalizzazione presenti nell'indice ha reso difficile generare valore aggiunto, poiché solo un numero esiguo di società è riuscito a battere i rendimenti del ristretto gruppo dei big di successo. L'attenuazione della sovraperformance dei Magnifici 7 durante il rally degli ultimi due mesi dell'anno scorso rappresenta un segnale positivo. È il risultato dell'annunciato taglio dei tassi d'interesse, nel 2024, da parte della Federal Reserve americana e lascia prevedere uno scenario più favorevole per la gestione attiva nell'anno in corso.

Il vincitore a sorpresa del 2023 è stato il mercato giapponese. L'indice di riferimento Topix Net Return ha chiuso l'anno con un rialzo del 27,8% in valuta locale, trainato da notizie positive su inflazione e consumi e dall'allentamento delle politiche di controllo della curva dei rendimenti da parte della Bank of Japan. Anche l'indice Eurostoxx 50 ha prodotto un anno di forti rendimenti, leggermente superiori al 22% in termini di valuta locale, sebbene sia rimasto indietro rispetto alle sue controparti statunitensi e globali a causa della minore concentrazione nel settore tecnologico e dell'esposizione a una Cina più debole attraverso il settore del lusso. A differenza del resto del mondo che ha registrato forti rialzi, il mercato azionario cinese ha vacillato nel 2023, nonostante le aspettative iniziali di una solida crescita economica dovuta alla riapertura dell'economia dopo i lockdown per il COVID. L'indice Hang Seng di Hong Kong ha registrato una perdita del 12,8% in valuta locale nel 2023, segnando la sua prima serie di quattro anni consecutivi in negativo dal suo lancio nel 1969. Il rallentamento ha colpito anche le azioni della Cina continentale, dove l'indice di riferimento CSI 300 ha registrato un calo dell'11,4% in valuta locale nell'arco dell'anno.

Il Treasury USA a 10 anni ha archiviato l'anno allo stesso livello di partenza - 3,87% - anche se in condizioni finanziarie molto diverse. Nonostante l'assenza di movimenti netti, per i rendimenti è stato un periodo all'insegna della volatilità con oscillazioni comprese fra il 3,31% e il 4,99%.

Gli spread di credito (il premio aggiuntivo riconosciuto ai detentori di obbligazioni corporate rispetto al debito pubblico) si sono ridotti nel corso dell'anno. All'inizio del 2023, il Bloomberg US Intermediate Credit Option Adjusted Spread segnava un premio di 104 punti base rispetto ai Treasury statunitensi di durata equivalente. Tale spread si è ampliato nel corso del primo trimestre, raggiungendo un massimo di 133 pb a metà marzo, in coincidenza con il fallimento di Silicon Valley Bank e Signature Bank. Nei restanti trimestri, tuttavia, lo spread si è costantemente ristretto e ha chiuso l'anno al livello più basso dell'anno a 81 punti base.

Anche i titoli di Stato tedeschi a 10 anni della zona euro hanno vissuto una stagione turbolenta ma, grazie a una forte ripresa a novembre e dicembre, sono riusciti a chiudere l'anno vicino al 2%, a fronte del 2,6% di fine 2022. Spinta dalle pressioni inflazionistiche a due cifre, la Banca Centrale Europea (BCE) ha proseguito la sua politica aggressiva di inasprimento monetario nella prima parte del 2023. I tassi di interesse sono stati innalzati di ulteriori 50 punti base sia a febbraio che a marzo. Successivamente, il ritmo degli aumenti è rallentato a 25 punti base per riunione tra maggio e settembre, portando il tasso di deposito al 4%.

Occorre osservare che, muovendosi all'unisono per tutto l'anno, la maggior parte delle principali categorie di attività ha mostrato una correlazione eccezionalmente elevata. Utilizzando l'indice S&P 500 come benchmark, nell'arco dell'anno era prevedibile attendersi che gli altri mercati azionari globali mostrassero correlazioni elevate, comprese fra lo 0,8 e lo 0,9. Meno prevedibilmente, le obbligazioni hanno fatto osservare livelli di correlazione altrettanto elevati, fra lo 0,8 e lo 0,9.

In questo contesto, i fondi a gestione alternativa (managed futures) hanno prodotto rendimenti negativi. Ciò è avvenuto a causa di bruschi campi di direzione del rischio e del trend di mercato alla fine del primo e all'inizio del secondo trimestre (il fallimento di SVB e First Republic Bank negli Stati Uniti e di Credit Suisse in Europa) e poi a novembre (il cosiddetto "rally generalizzato"), che hanno innescato causato una rapida inversione delle tendenze di medio e lungo termine.

Relazione della società di revisione

Agli azionisti di
iMG

Opinione

A nostro giudizio, i rendiconti finanziari allegati forniscono un'immagine veritiera della situazione patrimoniale e finanziaria di OYSTER (il "Fondo") e di ciascuno dei suoi comparti al 31 dicembre 2023, come anche del risultato delle operazioni e delle variazioni degli attivi netti per l'esercizio chiuso alla stessa data, il tutto in conformità con i requisiti di legge e normativi relativi alla stesura e alla presentazione dei rendiconti finanziari vigenti in Lussemburgo.

Gli elementi sottoposti a revisione

I rendiconti finanziari del Fondo comprendono:

- il prospetto combinato del patrimonio netto del Fondo e il prospetto del patrimonio netto di ciascun comparto al 31 dicembre 2023;
- il Conto economico consolidato e le variazioni del patrimonio netto dei Comparti e il Conto economico e le variazioni del patrimonio netto di ciascun comparto al 31 dicembre 2023;
- portafogli al 31 dicembre 2022; E
- a nota integrativa, comprensiva di una sintesi dei principali principi contabili.

Elementi su cui si basa la nostra opinione

Abbiamo condotto la nostra revisione in conformità con la Legge del 23 luglio 2016 recante disposizioni in materia di revisione contabile professionale (Legge del 23 luglio 2016) e i principi di revisione contabile internazionali (International Standards on Auditing, ISA) recepiti in Lussemburgo dalla "Commission de Surveillance du Secteur Financier" (CSSF). Le nostre responsabilità ai sensi della Legge del 23 luglio 2016 e dei principi di revisione contabile internazionali recepiti dalla CSSF sono illustrate in maggiore dettaglio nella sezione "Responsabilità del "Réviseur d'entreprises agréé" in materia di revisione contabile dei rendiconti finanziari" della nostra relazione.

Riteniamo che gli elementi probatori raccolti siano sufficienti e appropriati per formulare la nostra opinione.

Siamo indipendenti dal Fondo così come richiesto dal Codice deontologico per i professionisti contabili, inclusi gli Standard internazionali di indipendenza, emanato dall'International Ethics Standards Board for Accountants (Codice IESBA) e recepito in Lussemburgo dalla CSSF congiuntamente ai requisiti etici rilevanti ai fini della nostra revisione contabile dei rendiconti finanziari. Abbiamo ottemperato alle altre nostre responsabilità etiche sancite da tali regole deontologiche.

Altre informazioni

La responsabilità delle altre informazioni è del Consiglio di amministrazione del Fondo. Le altre informazioni comprendono le informazioni riportate nella relazione annuale ma non i rendiconti finanziari né la revisione contabile da noi effettuata degli stessi.

L'opinione da noi formulata in merito ai rendiconti finanziari non copre le altre informazioni e pertanto non esprimiamo alcuna forma di assicurazione o conclusione in proposito.

In riferimento alla revisione da noi effettuata sui rendiconti finanziari, è nostra responsabilità prendere visione delle altre informazioni sopra identificate e, nel farlo, valutare se tali altre informazioni siano significativamente incoerenti con i rendiconti finanziari o con le conoscenze da noi apprese nel corso della revisione ovvero sembrano contenere anomalie significative. Se, in base al lavoro da noi svolto, giungiamo alla conclusione che tali altre informazioni contengano anomalie significative, siamo tenuti a segnalarlo. A tale proposito, non abbiamo niente da segnalare.

Responsabilità del Consiglio di amministrazione del Fondo circa i rendiconti finanziari

Il Consiglio di amministrazione del Fondo ha il compito di redigere e presentare in modo veritiero e corretto i rendiconti finanziari, in conformità con i requisiti legali e normativi vigenti in Lussemburgo in materia di redazione e presentazione dei rendiconti finanziari ed è inoltre responsabile del controllo interno che riterrà necessario ai fini della redazione dei rendiconti finanziari senza inesattezze significative derivanti da frode o errori.

Nel redigere i rendiconti finanziari, il Consiglio di amministrazione del Fondo è tenuto a valutare la capacità del Fondo e di ciascuno dei suoi comparti di garantire la continuità aziendale, rendendo note, se del caso, le questioni ad essa attinenti e utilizzando il presupposto contabile della continuità aziendale, a meno che il Consiglio di amministrazione del Fondo non intenda liquidare il Fondo o chiudere qualsiasi suo comparto o cessare le operazioni, ovvero non abbia realisticamente nessun'altra alternativa.

Responsabilità del "Réviseur d'entreprises agréé" in materia di revisione contabile dei rendiconti finanziari

Le finalità della nostra revisione contabile sono di ottenere la ragionevole assicurazione che i rendiconti finanziari nel loro complesso non contengano anomalie significative dovute a frodi o errori e di stilare una relazione di revisione contabile comprendente la nostra opinione. Per ragionevole assicurazione si intende un elevato grado di assicurazione, non equiparabile tuttavia a una garanzia che la revisione contabile svolta in conformità con la Legge del 23 luglio 2016 e gli ISA recepiti in Lussemburgo dalla CSSF rilevi sistematicamente tutte le anomalie significative. Le anomalie possono derivare da frodi o errori e sono considerate significative se, prese singolarmente o nel loro insieme, sono ragionevolmente passibili di incidere sulle decisioni economiche che i lettori prendono sulla base di tali rendiconti finanziari.

In riferimento alla revisione contabile svolta in conformità con la Legge del 23 luglio 2016 e con gli ISA recepiti in Lussemburgo dalla CSSF, esercitiamo il nostro giudizio e scetticismo professionali durante l'intero processo di revisione. In aggiunta a ciò:

- individuamo e valutiamo i rischi di anomalie significative nei rendiconti finanziari, siano esse dovute a frodi o errori, elaboriamo e attuiamo procedure di revisione contabile ad hoc tenuto conto di tali rischi e raccogliamo elementi probatori sufficienti e appropriati per formulare la nostra opinione. Il rischio del mancato rilevamento di un'anomalia significativa derivante da frode è maggiore rispetto a quello associato alle anomalie dovute a errori, poiché la frode può comportare casi di collusione, falsificazione, omissioni intenzionali, false dichiarazioni o elusione del controllo interno;
- acquisiamo informazioni sul processo di controllo interno rilevanti ai fini della revisione contabile per predisporre procedure di revisione adeguate alle circostanze, ma non allo scopo di esprimere un'opinione sull'efficacia del controllo interno del Fondo;
- valutiamo l'adeguatezza delle politiche contabili utilizzate e la ragionevolezza delle stime contabili e delle relative informative rese dal Consiglio di amministrazione del Fondo;

- giungiamo ad una conclusione in merito alla correttezza dell'uso fatto dal Consiglio di amministrazione del Fondo del presupposto contabile di continuità aziendale e, in base agli elementi probatori acquisiti, appuriamo l'esistenza di incertezze rilevanti associate a eventi o condizioni suscettibili di mettere fortemente in dubbio la capacità del Fondo o di qualsiasi suo comparto di preservare la propria operatività. Se appuriamo l'esistenza di un'incertezza significativa, all'interno della nostra relazione di revisione contabile siamo tenuti a richiamare l'attenzione sulle relative informative contenute nei rendiconti finanziari ovvero, qualora tali informative fossero inadeguate, a modificare la nostra opinione. Le nostre conclusioni si basano sugli elementi probatori acquisiti alla data della nostra relazione. Ciò nonostante, è possibile che eventi o circostanze successivi impediscano al Fondo o a qualsiasi suo comparto di continuare a essere operativo;
- valutiamo la presentazione complessiva, la struttura e il contenuto dei rendiconti finanziari, ivi comprese le informative, e appuriamo se i rendiconti finanziari forniscono un quadro veritiero delle transazioni e degli eventi sottostanti.

Comunichiamo con le risorse incaricate della governance in merito a questioni quali il campo di applicazione previsto e le tempistiche della revisione contabile e condividiamo con esse le risultanze più significative, comprese eventuali lacune rilevanti a livello di controllo interno individuate nell'ambito del nostro processo di revisione.

iMGP

Altre note ai prospetti finanziari

Altre note ai prospetti finanziari

1 - Organizzazione

iMGP, la "SICAV", è una società di investimento a capitale variabile di diritto lussemburghese, costituita per una durata illimitata il 2 agosto 1996 in conformità alle disposizioni della Legge del 17 dicembre 2010 Parte I (di seguito la "Legge") e della legge del 10 agosto 1915 relativa alle società commerciali, e successive modifiche.

La SICAV è soggetta in particolare alle disposizioni della parte I della Legge, relativa agli Organismi di Investimento Collettivo in Valori Mobiliari (OICVM) come definiti dalla Direttiva del Parlamento europeo e del Consiglio del 13 luglio 2009 (2009/65/CEE, di seguito la "Direttiva"), e successive modifiche.

Lo Statuto è stato pubblicato per la prima volta in data 30 agosto 1996 nella sezione "Recueil des Sociétés et Associations" del "Mémorial". È stato in seguito modificato il 22 agosto 2012 e pubblicato nel "Recueil électronique des sociétés et associations" ("RESA") il 18 settembre 2012.

La SICAV è iscritta al Registro del Commercio e delle Imprese del Lussemburgo con il numero B-55740.

La SICAV è stata costituita sotto forma di un fondo a comparti multipli ed è composta da vari comparti, ognuno dei quali rappresenta un insieme di attività e impegni specifici e corrisponde a una politica d'investimento distinta

Al 31 Dicembre 2023, sono attivi venti comparti::

Le classi di azioni I M EUR, I M USD e I S USD del comparto iMGP - DBi Managed Futures Fund sono state lanciate il 25 gennaio 2023.

La classe di azioni I USD del comparto iMGP - DBi Managed Futures Fund è stata lanciata il 26 gennaio 2023.

La classe di azioni I CHF del comparto iMGP - DBi Managed Futures Fund è stata lanciata il 27 gennaio 2023.

La classe di azioni R USD del comparto iMGP - DBi Managed Futures Fund è stata lanciata il 16 febbraio 2023.

La classe di azioni C USD del comparto iMGP - Stable Return Fund è stata lanciata il 16 febbraio 2023.

Le classi di azioni I M GBP HP e R GBP D HP del fondo iMGP - Multi-Asset Absolute Return Fund (in precedenza Multi-Asset Absolute Return EUR) sono state lanciate il 3 marzo 2023.

Le classi di azioni I GBP e R GBP del comparto iMGP - DBi Managed Futures Fund sono state lanciate il 12 aprile 2023.

La classe di azioni I EUR HP del comparto iMGP - Global Risk-Balanced Fund è stata lanciata il 10 maggio 2023.

La classe di azioni I EUR 2 HP del comparto iMGP - US Core Plus Fund è stata lanciata il 17 luglio 2023.

La classe di azioni C USD del comparto iMGP - DBi Managed Futures Fund è stata lanciata il 14 agosto 2023.

La classe di azioni I EUR del comparto iMGP - Global Concentrated Equity Fund è stata lanciata il 2 ottobre 2023.

La classe di azioni I M SEK HP del comparto iMGP - DBi Managed Futures Fund è stata lanciata il 17 ottobre 2023.

La classe di azioni R CHF HP del comparto iMGP - DBi Managed Futures Fund è stata lanciata il 24 novembre 2023.

Le classi di azioni R GBP HP, I M GBP HP, R EUR HP, R USD e C EUR HP del comparto iMGP - DBi Managed Futures Fund sono state lanciate il 29 novembre 2023.

La classe di azioni I USD del comparto iMGP - Global Core Equity Fund è stata lanciata il 18 dicembre 2023.

Chiusura delle classi di azioni

La classe di azioni I CHF HP del comparto iMGP - US High Yield Fund è stata chiusa il 10 gennaio 2023.

La classe di azioni I CHF HP del comparto iMGP - US High Yield Fund è stata chiusa l'11 gennaio 2023 e le classi di azioni I USD e N EUR HP dello stesso comparto sono state chiuse il 28 aprile 2023.

Le classi di azioni R USD HP, R S EUR HP e R S USD HP del comparto iMGP - Japan Opportunities Fund hanno chiuso rispettivamente il 28 aprile 2023 e il 2 maggio 2023.

La classe di azioni R EUR del comparto iMGP - European Corporate Bonds Fund è stata chiusa il 28 aprile 2023.

Le classi di azioni I M EUR e R EUR del comparto iMGP - Italian Opportunities Fund hanno chiuso il 28 aprile 2023.

Le classi di azioni Z EUR e R CHF HP del comparto iMGP - Sustainable Europe Fund sono state chiuse il 28 aprile 2023.

La classe di azioni C USD del comparto iMGP - US Value Fund è stata chiusa il 28 aprile 2023.

La classe di azioni R S EUR HP del comparto iMGP - Japan Opportunities Fund è stata chiusa il 2 maggio 2023.

La classe di azioni I USD del comparto iMGP - Global Diversified Income Fund ha chiuso il 19 settembre 2023.

La classe di azioni I M EUR del comparto iMGP - Multi-Asset Absolute Return Fund (precedentemente Multi-Asset Absolute Return EUR) è stata chiusa il 25 ottobre 2023.

Altre note ai prospetti finanziari

2 - Sintesi dei principi contabili

2.1 - Presentazione dei prospetti contabili

Il bilancio della SICAV è redatto in conformità ai requisiti vigenti in Lussemburgo in materia di organismi di investimento collettivo. Ai fini del bilancio, per tutti i comparti è stato calcolato un NAV tecnico al 31 dicembre 2023.

2.2 - Valutazione del portafoglio titoli

I titoli ammessi alla quotazione ufficiale in una borsa valori o negoziati su un altro mercato regolamentato sono valutati sulla base dell'ultimo prezzo noto in Lussemburgo il giorno della valutazione. Se questi titoli sono scambiati su diversi mercati, verrà applicato l'ultimo prezzo noto del mercato principale. I titoli non ammessi alla quotazione ufficiale di una borsa o non negoziati su un altro mercato regolamentato e i titoli ammessi alla quotazione ufficiale di una borsa o negoziati su un altro mercato regolamentato, ma per i quali l'ultimo prezzo noto non è rappresentativo, sono valutati in base al probabile valore di realizzo stimato prudentemente e in buona fede dal Consiglio di Amministrazione.

2.3 - Profitti e perdite realizzati da vendite titoli

Gli utili o le perdite realizzati sulla vendita degli investimenti di ciascun comparto sono calcolati sulla base del costo medio degli investimenti venduti.

2.4 - Conversione di valuta estera

I saldi bancari, le altre attività nette e la valutazione degli investimenti espressi in valute diverse da quella del comparto sono convertiti in tale valuta ai tassi di cambio in vigore al 31 dicembre 2023.

Il costo di acquisizione degli investimenti di ciascun comparto denominati in valute diverse da quella del comparto stesso sarà convertito in tale valuta al tasso di cambio in vigore il giorno dell'acquisto.

I tassi di cambio utilizzati per la valutazione del valore patrimoniale netto al 31 dicembre 2023 sono i seguenti:

1 USD =	1,46553	AUD	1 USD =	1,31861	CAD	1 USD =	0,84162	CHF
1 USD =	6,74834	DKK	1 USD =	0,90526	EUR	1 USD =	0,78446	GBP
1 USD =	140,97999	JPY	1 USD =	10,15571	NOK	1 USD =	10,07785	SEK
1 USD =	18,28751	ZAR						

2.5 - Prospetti finanziari combinati

Il prospetto consolidato delle attività e passività e il prospetto consolidato delle operazioni e delle variazioni del patrimonio netto del Fondo, espressi in USD, corrispondono alla somma dei prospetti del patrimonio netto e dei prospetti delle operazioni e delle variazioni del patrimonio netto di ciascun comparto convertiti nella valuta del Fondo utilizzando gli ultimi tassi di cambio noti alla data di chiusura.

Il patrimonio netto iniziale è mantenuto al tasso di cambio in vigore alla fine dell'anno precedente. Le differenze di cambio risultanti sono incluse nel conto economico consolidato e nelle variazioni del patrimonio netto alla voce "Rivalutazione del saldo iniziale".

Lo stato patrimoniale consolidato e il conto economico consolidato e le variazioni del patrimonio netto per il periodo chiuso al 31 dicembre 2023 non sono stati rettificati per escludere l'impatto dei suddetti investimenti incrociati. Il Valore Netto d'Inventario consolidato, escluso l'importo degli investimenti nei suddetti comparti, ammonta a 1.464.973.157,86 USD

Altre note ai prospetti finanziari

2 - Sintesi dei principi contabili

2.5 - Prospetti finanziari combinati

Al 31 dicembre 2023, i seguenti comparti hanno investito in altri comparti del Fondo, come descritto di seguito:

Comparti	Investimenti intra-fondo	Importo (in USD)
iMGP - Balanced Strategy Portfolio USD Fund	iMGP - Stable Return R USD	1.544.160,00
iMGP - Balanced Strategy Portfolio USD Fund	iMGP - US Core Plus R USD	2.750.250,00
iMGP - Euro Fixed Income Fund	iMGP - European Subordinated Bonds I S EUR	1.046.309,35
iMGP - Global Diversified Income Fund	iMGP - Stable Return R USD	868.590,00
iMGP - Growth Strategy Portfolio USD Fund	iMGP - US Core Plus R USD	1.430.130,00
iMGP - Growth Strategy Portfolio USD Fund	iMGP - Stable Return R USD	2.258.334,00
iMGP - Multi-Asset Absolute Return Fund (precedentemente Multi-Asset Absolute Return EUR)	iMGP - Stable Return R USD	868.590,00
iMGP - Multi-Asset Absolute Return Fund (precedentemente Multi-Asset Absolute Return EUR)	iMGP - European Subordinated Bonds I S EUR	595.998,99
		11.362.362,34

2.6 - Contratti di opzioni

Le opzioni sono valutate all'ultimo prezzo noto alla data di valutazione. Le opzioni sono un tipo di strumento finanziario derivato. Il loro prezzo è intrinsecamente legato al prezzo di qualcos'altro. L'acquisto di un'opzione dà il diritto, ma non l'obbligo, di comprare o vendere un'attività sottostante a un prezzo specificato in una certa data o prima.

2.7 - Contratti a termine su divise

Gli utili o le perdite su cambi derivanti da contratti di cambio a termine non scaduti sono determinati utilizzando i tassi di cambio a termine applicabili alla data di valutazione e registrati nel conto economico consolidato e nelle variazioni del patrimonio netto.

Per ulteriori dettagli, si rimanda alle "Note al bilancio - Prospetti degli strumenti derivati".

2.8 - Contratti future finanziari

Gli utili o le perdite derivanti da contratti a termine non scaduti sono determinati sulla base dell'ultimo prezzo contrattuale noto alla data di valutazione e registrati nel prospetto combinato delle variazioni del patrimonio netto.

Per ulteriori dettagli, si veda la sezione "Note al bilancio - Dichiarazioni di strumenti derivati".

2.9 - Valutazione dei Contratti for Difference ("CFD")

I CFD sono valutati al valore equo sulla base dell'ultima curva di spread nota, dell'ultima curva di tasso nota e dell'ultimo prezzo di chiusura noto dell'attività sottostante. Un contratto per differenza (CFD) è un contratto tra due parti per scambiare, alla chiusura del contratto, la differenza tra il prezzo di apertura e di chiusura dell'azione sottostante moltiplicato per il numero di azioni specificato nel contratto.

Quando si valutano i CFD, viene eseguito un "reset" (registrazione dei CFD al prezzo di apertura) nel calcolo del valore patrimoniale netto ad ogni fine mese. I guadagni o le perdite non realizzati sono riportati come profitto o perdita netta sui CFD.

2.10 - Valutazione degli swaps

Credit Default Swaps, Interest Rate Swaps are valued at fair value based respectively on the last known spread curve, rates curve and last known closing price of the underlying asset. Swaps are derivative instruments that represent an agreement between two parties to exchange a series of cash flows over a specific period of time. A total return swap gives an investor the benefits of owning a security without actual ownership. A credit default swap offers insurance in case of default by a third-party borrower.

Altre note ai prospetti finanziari

2 - Sintesi dei principi contabili

2.11 - Reddito da dividendo e interesse

I dividendi sono registrati come reddito alla data in cui le azioni sono quotate per la prima volta "ex-dividendo". Gli interessi vengono maturati quotidianamente.

2.12 - Prestito titoli

Ciascun portafoglio può prestare i titoli inclusi nel proprio portafoglio a un mutuatario. A garanzia di tale operazione, la Società riceve garanzie. I titoli prestati sono consegnati a un intermediario terzo il cui patrimonio continua a essere valutato come parte del portafoglio del comparto interessato. In caso di risoluzione di un prestito, il comparto interessato è tenuto a restituire la garanzia depositata al mutuatario. I prestiti possono essere risolti dal relativo comparto o dal mutuatario in qualsiasi momento.

I proventi da prestito titoli sono contabilizzati per cassa e rilevati nel conto economico e nelle variazioni del patrimonio netto alla voce "Ricavi da prestito titoli".».

2.13 - Distribuzione dei costi e delle spese

Gli oneri e le spese attribuibili a una particolare classe di azioni e/o a un particolare comparto saranno attribuiti direttamente a tale classe e/o comparto. Altri costi e spese che non sono direttamente attribuibili a una determinata classe di azioni e/o a un determinato comparto saranno ripartiti equamente tra le diverse classi all'interno dei diversi comparti e/o tra i diversi comparti. Se l'importo dei costi e delle spese lo richiede, essi saranno addebitati alle classi di azioni e/o ai comparti in proporzione al loro rispettivo patrimonio netto.

2.14 - Spese di transazione

Per il periodo che termina il 31 dicembre 2023 i comparti hanno sostenuto i seguenti costi di transazione (commissioni di intermediazione) in relazione alla vendita o all'acquisto di valori mobiliari, strumenti del mercato monetario, derivati o altre attività idonee.

I costi di transazione sono spesati e indicati separatamente nel Prospetto delle operazioni e delle variazioni del patrimonio netto alla voce "Costi di transazione".

2.15 - Investimenti pagati in anticipo

Gli anticipi sull'acquisto di fondi d'investimento che non sono efficaci fino al 30 giugno 2021 sono riportati alla voce "Anticipo su titoli acquistati".

2.16 - Investimenti anticipati

Le sottoscrizioni ricevute che hanno effetto solo dopo la fine dell'anno sono esposte come abbonamenti da ricevere.

2.17 - Abbreviazioni usate nei portafogli titoli

A: Annual
Q: Trimestrale
S: Semestrale
M: Mensile
XX: obbligo perpetuo

3 - Comisiones de gestión y de resultados

a) Comisiones de gestión

Il 17 novembre 2006, la SICAV ha stipulato un contratto della durata indefinita con SYZ Asset Management (Luxembourg) S.A. (il "Gestore") per la gestione degli attivi dei comparti, che ciò nonostante rimangono sotto il controllo permanente del Consiglio di amministrazione della SICAV.

A titolo di compenso per le sue prestazioni professionali, SYZ Asset Management (Luxembourg) S.A. percepisce dalla SICAV, al termine di ciascun trimestre, una commissione di gestione ai tassi annui riportati di seguito e applicati al Valore netto d'inventario medio di ciascuna classe di azioni. Una parte di tale commissione di gestione viene corrisposta ai diversi Subgestori a titolo di compenso per le rispettive prestazioni.

b) Commissione specifica per la gestione del rischio di cambio delle Classi di Azioni HA e HP

Come compenso per i servizi descritti per queste Classi, le Azioni delle Classi HA e HP possono pagare, ciascuna separatamente, alla fine di ogni trimestre, una commissione di gestione del rischio di cambio al tasso annuo massimo dello 0,10% del Valore Netto medio dell'inventario per Azione delle Classi di Azioni HA e HP. Questa commissione sarà pagabile all'entità responsabile della gestione dei cambi.

c) Commissione della Società di Gestione

La commissione della Società di Gestione può ammontare fino allo 0,30% annuo del Valore Patrimoniale Netto di ciascun comparto, pagabile alla fine di ogni mese.

La commissione della Società di Gestione mira a:

- Retribuire mensilmente la Società di Gestione per i servizi di amministrazione centrale forniti alla SICAV, compresi i servizi di controllo;
- Remunerare CACEIS Bank, filiale di Lussemburgo per le sue funzioni di Amministrazione centrale, Agente per i trasferimenti e Conservatore del registro;
- Sostenere costi di marketing e pubblicità.

d) Commissione di gestione del fondo target

Quando un comparto acquisisce fondi target collegati, per questi fondi viene addebitata una commissione di gestione ridotta pari al massimo allo 0,25% (tasso annuo).

La tabella seguente riassume le aliquote annuali delle commissioni di gestione applicate agli altri OICR investiti dai comparti iMGP al 31 dicembre 2023:

4 - Commissioni di performance

Al 31 dicembre 2023 nessun comparto iMGP è soggetto alla relativa commissione di performance.

In conformità con le linee guida ESMA sulle commissioni di performance (ESMA34-39-992) e la circolare CSSF 20/764, è richiesto di visualizzare l'importo effettivo delle commissioni di performance addebitate da ciascuna Classe di Azioni interessata e la percentuale di tali commissioni in base all'Azione. Valore patrimoniale netto della categoria ("NAV"). Al 31 dicembre 2023, nessuna Classe di Azioni è soggetta a commissioni di performance.

5 - Commissioni della banca depositaria

La SICAV paga alla Banca depositaria una commissione annua che varia tra lo 0,005% e lo 0,10% del Valore netto d'inventario per ciascun comparto. Tali commissioni sono pagabili su base mensile e non comprendono le commissioni di transazione o le commissioni delle banche subdepositarie o di agenti simili. La Banca depositaria ha inoltre diritto a essere rimborsata per gli esborsi e le spese ragionevoli che non siano ricompresi nelle spese indicate di seguito.

6 - Tassa d'abbonamento ("*Taxe d'abonnement*")

La SICAV è sottoposta alle leggi fiscali lussemburghesi. Secondo la legislazione e i regolamenti in vigore attualmente, la SICAV è sottoposta in Lussemburgo ad una tassa annua dello 0,05% (la tassa di sottoscrizione) pagabile trimestralmente e calcolata sugli attivi netti di ciascun comparto della SICAV alla fine di ogni trimestre.

Detta imposta è limitata allo 0,01% del valore patrimoniale per le classi di azioni riservate agli investitori istituzionali.

Nessuna tassa aggiuntiva è dovuta sugli attivi detenuti in quote di altri OICVM già sottoposti a questa tassa in Lussemburgo

7 - Altre questioni fiscali

In diversi Stati membri dell'Unione Europea, gli organismi di investimento collettivo (OPC) possono avanzare pretese al fine di recuperare le imposte ritenute indebitamente pagate ai sensi della normativa fiscale vigente. La società di gestione del Fondo ha deciso di presentare ricorso alle autorità fiscali di questi Stati membri per recuperare tali somme. Tali crediti sono iscritti nella sezione Altre attività del presente bilancio.

iMGP

Altre note ai prospetti finanziari

8 - Prestito di titoli

Per l'esercizio finanziario terminato il 31 dicembre 2023, il reddito da prestito titoli generato dalla SICAV è il seguente:

Comparti	Valuta	Importo lordo totale del reddito da prestito titoli	Costi e commissioni diretti e indiretti dedotti dai ricavi lordi da prestito titoli	Importo netto totale del reddito da prestito titoli
iMGP - Absolute Return GBP (liquidata il 03/03/23)	GBP	36.16	7.23	28.93
iMGP - Euro Fixed Income Fund	EUR	312.73	62.55	250.18
iMGP - European Corporate Bonds Fund	EUR	45.75	9.15	36.60
iMGP - European Subordinated Bonds Fund	EUR	407.06	81.41	325.65
iMGP- Global Diversified Income Fund	USD	294.91	58.98	235.93
iMGP - Italian Opportunities Fund	EUR	21.86	4.37	17.49
iMGP - Japan Opportunities Fund	JPY	7,319,371	1,463,874	5,855,497
iMGP - Multi-Asset Absolute Return Fund (precedentemente Multi-Asset Absolute Return EUR)	EUR	575.80	115.16	460.64
iMGP - US Value Fund	USD	577.03	115.41	461.62

I proventi da operazioni di prestito titoli sono inclusi nella voce "Ricavi da prestito titoli" del conto economico e variazioni del patrimonio netto.

Al 31 dicembre 2023 non sono presenti titoli in prestito.

9 - Distribuzione di dividendi

Il Fondo ha distribuito i seguenti dividendi durante l'esercizio chiuso al 31 dicembre 2023:

Comparti	Classe di azioni	ISIN	Divisa	Dividendo	Data di godimento	Data di pagamento

10 - Swing pricing

La Società di Gestione ha messo in atto un meccanismo di protezione inteso a evitare la diluizione della performance, con una soglia di attivazione, al fine di tutelare gli interessi degli azionisti dei Comparti. Questo meccanismo di protezione è applicabile a tutti i compartii del Fondo.

Il costo effettivo di acquisto o vendita di attività e investimenti per un determinato Fondo può discostarsi dall'ultimo prezzo disponibile, se applicabile, nel calcolo del Valore patrimoniale netto a causa degli impegni sul prezzo di acquisto e della vendita degli investimenti sottostanti. Questi costi hanno un effetto negativo sul valore di un Fondo e sono chiamati "diluizione". Infatti, in caso di sottoscrizioni o rimborsi significativi all'interno del Comparto, il Subgestore interessato dovrà investire/disinvestire gli importi corrispondenti, generando così transazioni significative che possono dar luogo a transazioni variabili, commissioni a seconda della tipologia dei beni interessati. Queste commissioni sono principalmente tasse su alcuni mercati e commissioni di esecuzione addebitate dai broker. Possono essere di importi fissi o variabili proporzionali ai volumi negoziati e/o assumere la forma della differenza tra il prezzo di acquisto e di vendita di uno strumento finanziario da un lato e il prezzo di valutazione dall'altro.

Per attenuare gli effetti della diluizione, il Consiglio di amministrazione può, a sua discrezione, apportare un aggiustamento al Valore patrimoniale netto per tenere conto della diluizione. L'obiettivo del meccanismo anti-diluizione, noto anche come "swing pricing", è quindi quello di far sostenere agli investitori i costi che stanno dietro le operazioni di sottoscrizione/rimborso interessate e di tutelare gli altri investitori. In generale, la necessità di effettuare un aggiustamento della diluizione dipenderà dal volume di sottoscrizioni o rimborsi di Azioni nel relativo Fondo. Il Consiglio di Amministrazione può effettuare un aggiustamento della diluizione se ritiene che gli Azionisti esistenti (in caso di sottoscrizione) o gli Azionisti rimanenti (in caso di rimborso) potrebbero subire un impatto negativo.

Il Consiglio di Amministrazione ha affidato alla Società di Gestione l'attuazione e l'esecuzione del meccanismo antidiluizione. In pratica, in un giorno di calcolo del Valore Patrimoniale Netto, se l'importo netto degli ordini di sottoscrizione e di rimborso provenienti dagli investitori di tutte le Classi di azioni di un Comparto supera una soglia fissata in anticipo dalla Società di Gestione, espressa in termini di percentuale del patrimonio netto del Comparto (detta "soglia di attivazione"), il Valore Patrimoniale Netto può essere adeguato al rialzo o al ribasso al fine di tenere conto dei costi di riaggiustamento attribuibili alla sottoscrizione/rimborso netto degli ordini. Più specificamente, il Valore Patrimoniale Netto del relativo Comparto sarà adeguato (al rialzo o al ribasso) al fine di riflettere lo spread stimato tra il prezzo di offerta e il prezzo di richiesta delle attività in cui investe il Comparto, l'imposta stimata oneri e/o costi di transazione ai quali il Comparto potrebbe essere esposto.

In caso di sottoscrizioni nette, potrebbe verificarsi un aumento del Valore Patrimoniale Netto, ovvero un aumento del prezzo di acquisto per tutti gli investitori che sottoscrivono o riscattano Azioni in quella Data.

In caso di rimborsi netti, potrebbe verificarsi una riduzione del Valore patrimoniale netto, ovvero una riduzione del prezzo di vendita per tutti gli investitori che riscattano o sottoscrivono Azioni in quella Data di negoziazione.

Il Valore Patrimoniale Netto di ciascuna Classe di Azioni del Comparto sarà calcolato separatamente. Tuttavia, qualsiasi aggiustamento della diluizione influenzerà, in termini percentuali, il Valore Patrimoniale Netto di ciascuna Classe di Azioni allo stesso modo. L'entità di tale variazione dipende dalla stima della Società di Gestione dei costi di transazione applicati alle tipologie di attivi interessati. Il Valore Patrimoniale Netto Rettificato è l'unico Valore Patrimoniale Netto comunicato agli azionisti dei Comparti. Nel caso delle commissioni di performance, tali commissioni vengono calcolate prima dell'applicazione del meccanismo anti-diluizione, il che le rende insensibili all'impatto dello swing pricing. In conformità alla normativa, la Società di Gestione non informa gli azionisti della soglia limite e garantisce che i canali informativi interni siano limitati al fine di preservare la natura riservata delle informazioni.

Altre note ai prospetti finanziari

10 - Swing pricing

Poiché tale aggiustamento è legato all'importo netto degli ordini di sottoscrizione e di rimborso del Comparto, non è possibile prevedere con precisione se lo swing pricing verrà applicato in un dato momento futuro, né con quale frequenza la gestione della Società effettuerà tali aggiustamenti. L'adeguamento del prezzo non supererà il 2,5% del Valore patrimoniale netto, salvo circostanze eccezionali, ad esempio in caso di sostanziale calo della liquidità. Se tale limite del 2,5% viene superato, la Società di gestione ne informerà la CSSF e ne darà comunicazione agli azionisti pubblicando l'informazione sul sito web.

Nel corso del 2023 i seguenti comparti hanno subito almeno un'attivazione dello swing pricing:

Absolute Return GBP Fund
 Global Diversified Income Fund
 European Subordinated Bonds Fund
 European Corporate Bonds Fund
 Euro Fixed Income Fund
 US High Yield Fund
 US Core Plus Fund
 Multi-Asset Absolute Return Fund (precedentemente Multi-Asset Absolute Return EUR)

Tutte le attivazioni dello swing price hanno avuto un impatto sui prezzi delle classi di azioni al di sotto del limite massimo indicato nel prospetto. Non vi è alcuna oscillazione sui NAV riportati nel bilancio al 31 dicembre 2023.

Lo swing pricing parziale verrà implementato sui seguenti comparti a partire dal 31 dicembre 2023

US Value Fund
 Italian Opportunities Fund
 Japan Opportunities Fund
 Global Concentrated Fund
 Global Core Equity Fund
 US Small and Mid Company Growth Fund

Nel 2023 non è stata effettuata alcuna richiesta di Adhoc Swing.

11 - Altre spese

Le altre spese sono composte principalmente da costi di ricerca, commissioni di gestione del prestito titoli, spese legali, commissioni di audit, deposito fiscale, tasse IVA e marketing.

12 - Contanti in banca presso l'intermediario e garanzie

Al 31 dicembre 2023, vi erano contanti presso la banca presso l'intermediario e importi di garanzia sotto forma di saldi di cassa detenuti presso gli intermediari che sono inclusi nella liquidità presso la banca riportata nel prospetto del patrimonio netto. Le seguenti tabelle presentano la distribuzione di tali importi di liquidità detenuti presso intermediari e garanzie per Comparto, al 31 dicembre 2023:

Contanti in banca:

Compartimenti	Valuta	Contanti presso il broker nella valuta del comparto
iMGP- DBi Managed Futures Fund	EUR	34,74
	USD	5.826.048,31
iMGP - Balanced Strategy Portfolio USD Fund	EUR	98.786,50
	USD	133.175,72
iMGP - Global Diversified Income Fund	EUR	86.628,64
	JPY	48.716,95
	USD	30.390,12
iMGP - Growth Strategy Fund	EUR	227.967,40
	USD	376.393,69
iMGP - Stable Return Fund	USD	2.280.782,77
iMGP - Euro Fixed Income Fund	EUR	-141.253,70
iMGP - European Corporate Bonds Fund	EUR	154.012,97
iMGP - European Subordinated Bonds Fund	EUR	535.770,18
iMGP - Japan Opportunities Fund	JPY	121.041.135
iMGP - Multi-Asset Absolute Return (precedentemente Multi-Asset Absolute Return EUR)	EUR	-10.126,20
	JPY	11.025,43
	USD	39.627,94

La controparte è Morgan Stanley.

Compenso

La Direttiva europea 2014/91/UE che modifica la Direttiva 2009/65/CE relativa agli organismi di investimento collettivo in valori mobiliari, applicabile a iMGP, la SICAV, è entrata in vigore il 18 marzo 2016. È recepita nel diritto nazionale ai sensi della legge lussemburghese del 17 dicembre 2010 e successive modifiche. In conseguenza di questa nuova normativa, l'OICVM è tenuto a pubblicare nella relazione annuale le informazioni relative alla remunerazione dei dipendenti individuati ai sensi della legge.

Politica di remunerazione della società di gestione

L'attuale politica di remunerazione della Società di gestione può essere consultata sul sito www.imgp.com.

Dati quantitativi

La tabella seguente fornisce una panoramica della remunerazione complessiva complessiva per il 2022 corrisposta al personale della Società di Gestione per i servizi resi e il numero dei beneficiari. Non è possibile fornire una ripartizione più dettagliata della remunerazione attribuibile alla Società di gestione in modo pertinente o affidabile. Tuttavia, per contesto, la società di gestione gestisce un FIA (con 2 comparti) e un OICVM (con 20 comparti), con un patrimonio in gestione al 31 dicembre 2023 rispettivamente pari a 1,48 USD.

	Fisso	Variabile	Numero di beneficiari	Interessi differiti pagati
Squadra completa	EUR 1.395.007	EUR 133.700	12	Néant

Il "personale identificato" della società di gestione è il personale le cui azioni hanno un impatto significativo sul profilo di rischio della società di gestione o degli OICVM da essa gestiti.

Ai fini di quanto sopra, nei casi in cui l'attività di gestione del portafoglio è stata formalmente delegata, non è stata inclusa la remunerazione dei relativi dipendenti del delegante.

Gestione del rischio

In termini di gestione del rischio, il Consiglio di amministrazione della SICAV ha adottato l'approccio basato sugli impegni come metodo per determinare il rischio complessivo per i seguenti comparti:

iMGP - Balanced Strategy Portfolio USD Fund
iMGP - BM Alternativos Fund
iMGP - Euro Fixed Income Fund
iMGP - European Corporate Bonds Fund
iMGP - European Subordinated Bonds Fund
iMGP - Global Concentrated Equity Fund
iMGP - Global Core Equity Fund (lanciato il 18/12/23)
iMGP - Global Risk Balanced Fund
iMGP - Growth Strategy Portfolio USD Fund
iMGP - Italian Opportunities Fund
iMGP - Japan Opportunities Fund
iMGP - Multi-Asset Absolute Return Fund
(precedentemente Multi-Asset Absolute Return EUR)
iMGP - Sustainable Europe Fund
iMGP - US Core Plus Fund
iMGP - US High Yield Fund
iMGP - US Small and Mid Company Growth Fund
iMGP - US Value Fund
e il metodo VaR per i seguenti comparti:

Fund name	Method of calculating overall exposure	Method of calculating VaR	Confidence Index	Holding period	Observation period	Floor VaR 01/01/2023 / 31/12/2023	Ceiling VaR 01/01/2023 / 31/12/2023	Average VaR 01/01/2023 / 31/12/2023	Legal limit	Internal limit	Leverage 01/01/2023 / 31/12/2023	Method use
iMGP - DBi Managed Futures Fund (lancé le 25/01/23)	Absolute VaR	Historical	99%	1 month	2 years	2.46%	17.45%	9.52%	20.00%	18.00%	241.76%	Sum of notional
iMGP - Stable Return Fund	Absolute VaR	Historical	99%	1 month	2 years	1.28%	5.25%	2.63%	20.00%	7.00%	180.14%	Sum of the notionals
iMGP - Global Diversified Income Fund	Absolute VaR	Historical	99%	1 month	2 years	4.52%	7.30%	6.14%	20.00%	7.00%	177.49%	Sum of the notionals

Si veda la Nota 1 per gli eventi societari dettagliati sulla SICAV.

Total Expense Ratios ("TER")

Informazioni per gli investitori svizzeri

4. Informazioni legali

Rappresentante

Il rappresentante in Svizzera è CACEIS (Switzerland) S.A. (il "Rappresentante svizzero"), Route de Signy 35, CH-1260 Nyon, Svizzera.

Servizio di pagamento

Il servizio di pagamento in Svizzera è fornito da CACEIS Bank, Montrouge, filiale di Nyon / Svizzera, con sede legale, Route de Signy 35, CH-1260 Nyon, Svizzera (il "Servizio di pagamento in Svizzera").

Luogo in cui è possibile ottenere i documenti pertinenti

Il prospetto e i KID, gli statuti, l'elenco degli acquisti e delle vendite avvenuti durante l'esercizio finanziario in esame, nonché le relazioni annuali e semestrali della SICAV possono essere ottenuti su richiesta e gratuitamente presso il Rappresentante in Svizzera.

Pubblicazione

Le pubblicazioni relative a iMGP vengono effettuate in Svizzera tramite www.fundinfo.com.

I prezzi di emissione e di riscatto e/o il valore d'inventario, con la dicitura "commissioni escluse" di tutte le classi di azioni vengono pubblicati quotidianamente per ogni emissione e riscatto di azioni sul sito www.fundinfo.com.

Luogo di esecuzione e foro competente

Per le quote di fondi offerte in Svizzera il luogo di esecuzione è presso la sede del rappresentante. Il foro legale è presso la sede del rappresentante, ovvero presso la sede o il domicilio dell'investitore.

5. Total Expense Ratio ("TER")

I TER sono stati calcolati in conformità alla "Direttiva per il calcolo e la pubblicazione del Total Expense Ratio (TER) degli investimenti collettivi di capitale del 16 maggio 2008 (stato al 20 aprile 2015)" promulgata dalla "Association de gestion d patrimoine Svizzera (AMAS).

Al 31 dicembre 2023, il TER calcolato per ciascuna Classe di Azioni attiva è il seguente:

ISIN	Comparti e classi di azioni	TER con prestazioni (in %)	Rapporto di prestazione (in %)	TER Sintetico (in %) (Se applicabile)

SFDR (Sustainable Finance Disclosure Regulation)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - EURO FIXED INCOME Legal entity identifier: 549300K3F0F5XCOPFS64

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager's view on sustainable development.

The Sub-Manager believes that responsible investment practices incorporating an assessment of ESG factors adds sustainable value for the Sub-fund's investors by mitigating risk and positively influencing long-term financial performance.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve an ESG Quality Score, as measured by the Sub-Manager methodology, at least equal to that of the reference index, the Bloomberg Euro Agg Total Return Index. During the period under review, the ESG Quality Score of the portfolio based on the Sub-Manager's data provider report, rated 7.5 out of 10. The portfolio ESG Quality Score score is a compounded score adjusted by industry, momentum and overall rating distribution.

The ESG Quality Score of the Bloomberg Euro Agg Total Return Index was 7.1 out of 10.

● ***...and compared to previous periods?***

In 2022, the ESG Quality Score of the portfolio based on the Sub-Manager's data provider report, rated 8.4 out of 10. The portfolio ESG Quality Score score is a compounded score adjusted by industry, momentum and overall rating distribution.

The ESG Quality Score of the Bloomberg Euro Agg Total Return Index was 6.9 out of 10.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint was on average 68.5 T CO₂ Emission/mln\$ Sales.

2. Exposure to companies active in the fossil fuel sector:

In 2023 on average, 7.9% of the portfolio’s weight had involvement in fossil fuels. At the end of 2023, two companies in the Utilities sector and two in the Energy sector are generating this exposure. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services. If this percentage is positive for a company, the total weight of exposure to this company is taken into account in the measure, even if the percentage of revenue is small.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In 2023, 0% of the Sub-Fund's assets were exposed to companies which are in violation of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● *What was the asset allocation?*

As at 31 December 2023:

100% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

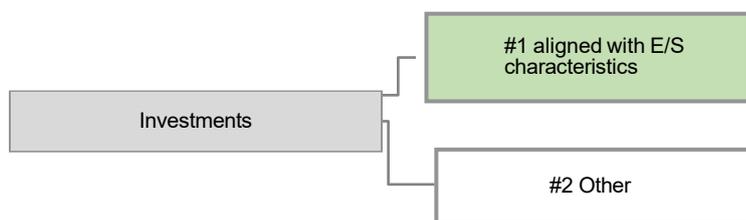

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

0% of the Sub-Fund’s assets were invested in #2 Other.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo % PTF
Government	65,91%
Financials	32,51%
Utilities	9,26%
Industrials	8,08%
Consumer Staples	4,11%
Consumer Discretionary	3,13%
Health Care	1,4%
Cash & Others	-24,41%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas

In nuclear energy

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments, units of collective investment schemes as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

These investments do not follow minimum environmental and social safeguards.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Manager believes that issuer engagement as a debt holder tends to be more indirect when compared to that of an equity owner. While an equity owner can ultimately vote (and accordingly replace) the members of a portfolio company's board of directors, the opportunities to actively engage as a fixed income investor tend to occur around events such as new debt issuances and corporate restructurings. In such cases, depending on the size of the position held by the Sub-fund relative to the total class of debt, the Sub-Manager may be able to exert some degree of influence over an issuer, particularly with respect to governance and reporting issues but also more broadly environmental and social issues as appropriate. The Sub-Manager's active approach to fixed income investing generally includes frequent interaction with company management, as it seeks to keep an open line of communication with respect to actions that could negatively impact the value of the investment made by the Sub-fund. While the Sub-Manager does not always agree with the policies implemented by an issuer's management, it believes that remaining active and engaged will typically result in more constructive, long-term relationships surrounding topical issues, including ESG concerns.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - EUROPEAN CORPORATE BONDS Legal entity identifier: 549300F1JNLOTH0MCP84

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager's view on sustainable development.

Sustainability and the management of any activity according to the best practices of "good governance" are in fact essential factors for the creation of value in the short term but even more so in the medium to long term. A focus on the sustainability of companies

can affect their ability to create long-term value for investors and stakeholders; therefore, the Sub-Manager considers ESG integration an important tool to improve the risk/return profile of investments.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve a weighted ESG average score, as measured by the Sub-Manager methodology equal or higher than 70 on a scale from 0 to 100.

As at 31 December 2023, based on the Sub-Manager methodology, the weighted ESG average score is 72.7.

In addition to that, investing in worst-in-class issuers is not allowed and a limit of maximum 10% exposure has been set both for laggard issuers (i.e. with an ESG score below 40/100 according to the Sub-Manager methodology) and not rated issuers.

As at 30 December 2023, based on the Sub-Manager methodology:

- The Sub-fund had 4.1% exposure to laggard issuers
- The Sub-fund had 0.0% exposure to not rated issuers

● ***...and compared to previous periods?***

As at 31 December 2022, based on the Sub-Manager methodology, the weighted ESG average score is 76.4.

In addition to that, investing in worst-in-class issuers is not allowed and a limit of maximum 10% exposure has been set both for laggard issuers (i.e. with an ESG score below 40/100 according to the Sub-Manager methodology) and not rated issuers.

As at 30 December 2022, based on the Sub-Manager methodology:

- The Sub-fund had 0% exposure to laggard issuers
- The Sub-fund had 8.8% exposure to not rated issuers

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint was on average 55.2 TC02 Emission/mIn\$ Sales.

2. Exposure to companies activities in the fossil fuel sector:

In 2023, 11% of the portfolio on average had involvement in fossil fuels. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services. If this percentage is positive for a company, the total weight of exposure to this company is taken into account in the measure, even if the percentage of revenue is small.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund's assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

In 2023, 0% of the Sub-Fund's assets were exposed to companies which are in violation of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

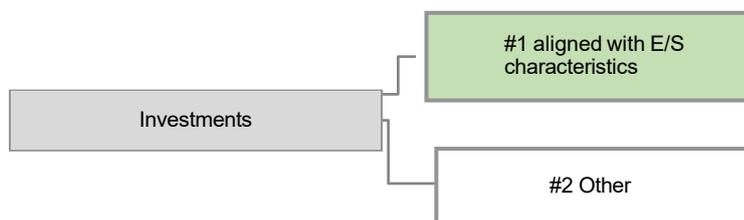

● What was the asset allocation?

As at 31 December 2023:

97% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

3% of the Sub-Fund's assets were invested in #2 Other.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● ***In which economic sectors were the investments made?***

As at 31 December 2023, the Sub-fund's investments were made in the following economic sectors:

Sectors	Expo %
Financials	45,63%
Industrials	8,91%
Consumer Staples	8,65%
Consumer Discretionary	7,65%
Health Care	7,33%
Energy	6,15%
Utilities	5,49%
Materials	3,72%
Communications	3,41%
Cash & Others	3,05%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes
 - In fossil gas
 - In nuclear energy
- No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include certain securities, as explained below, cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

Securities included in this category present an ESG score below 40/100 (according to the Sub-Manager methodology) or do not have an ESG rating.

For securities included in “Other”, minimum environmental and social safeguards apply. Corporate issuers need to be compliant with the UNGC principles or OECD Guidelines for Multinational Enterprises and not be involved in very severe

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

controversies regarding environmental, social or governance issues or socially controversial activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Manager believes that issuer engagement as a debt holder tends to be more indirect when compared to that of an equity owner. While an equity owner can ultimately vote (and accordingly replace) the members of a portfolio company's board of directors, the opportunities to actively engage as a fixed income investor tend to occur around events such as new debt issuances and corporate restructurings. In such cases, depending on the size of the position held by the Sub-fund relative to the total class of debt, the Sub-Manager may be able to exert some degree of influence over an issuer, particularly with respect to governance and reporting issues but also more broadly environmental and social issues as appropriate. The Sub-Manager's active approach to fixed income investing generally includes frequent interaction with company management, as it seeks to keep an open line of communication with respect to actions that could negatively impact the value of the investment made by the Sub-fund. While the Sub-Manager does not always agree with the policies implemented by an issuer's management, it believes that remaining active and engaged will typically result in more constructive, long-term relationships surrounding topical issues, including ESG concerns.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - EUROPEAN SUBORDINATED BONDS
 Legal entity identifier: 5493009WNONMHMH5OP67

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager’s view on sustainable development.

Sustainability and the management of any activity according to the best practices of “good governance” are in fact essential factors for the creation of value in the short term

but even more so in the medium to long term. A focus on the sustainability of companies can affect their ability to create long-term value for investors and stakeholders; therefore, the Sub-Manager considers ESG integration an important tool to improve the risk/return profile of investments.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve a weighted ESG average score, as measured by the Sub-Manager methodology equal or higher than 70 on a scale from 0 to 100.

As at 31 December 2023, based on the Sub-Manager methodology, the weighted ESG average score is 75.3.

In addition to that, investing in worst-in-class issuers is not allowed and a limit of maximum 10% exposure has been set both for laggard issuers (i.e. with an ESG score below 40/100 according to the Sub-Manager methodology) and not rated issuers.

As at 31 December 2023, based on the Sub-Manager methodology:

- The Sub-fund had 0.0% exposure to laggard issuers
- The Sub-fund had 4.2% exposure to not rated issuers

● ***...and compared to previous periods?***

As at 31 December 2022, based on the Sub-Manager methodology, the weighted ESG average score is 73.5.

In addition to that, investing in worst-in-class issuers is not allowed and a limit of maximum 10% exposure has been set both for laggard issuers (i.e. with an ESG score below 40/100 according to the Sub-Manager methodology) and not rated issuers.

As at 31 December 2022, based on the Sub-Manager methodology:

- The Sub-fund had 1.8% exposure to laggard issuers
- The Sub-fund had 8.6% exposure to not rated issuers

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint was on average 31.7 TC02 Emission/mln\$ Sales.

2. Exposure to companies activities in the fossil fuel sector:

In 2023 on average, 8.8% of the portfolio had involvement in fossil fuels. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services. If this percentage is positive for a company, the total weight of exposure to this company is taken into account in the measure, even if the percentage of revenue is small.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund's assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

In 2023, 0% of the Sub-Fund's assets were exposed to UN Global Compact principles risk.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

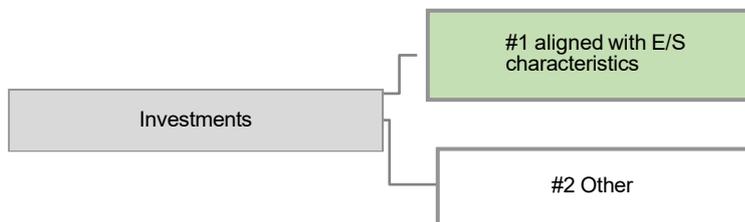

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● *What was the asset allocation?*

As at 31 December 2023:

96.6% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

3.4% of the Sub-Fund's assets were invested in #2 Other.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● *In which economic sectors were the investments made?*

As at 31 December 2023, the Sub-fund's investments were made in the following economic sectors:

Sectors	Expo % PTF
Financials	80,74%
Utilities	5,71%
Energy	3,96%
Communications	2,25%
Industrials	2,06%
Government	1,87%
Cash & Others	3,42%

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?*

- Yes
 - In fossil gas
 - In nuclear energy
- No

● *What was the share of investments made in transitional and enabling activities?*

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include certain securities, as explained below, cash,

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

Securities included in this category present an ESG score below 40/100 (according to the Sub-Manager methodology) or do not have an ESG rating.

For securities included in “Other”, minimum environmental and social safeguards apply. Corporate issuers need to be compliant with the UNGC principles or OECD Guidelines for Multinational Enterprises and not be involved in very severe controversies regarding environmental, social or governance issues or socially controversial activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Manager believes that issuer engagement as a debt holder tends to be more indirect when compared to that of an equity owner. While an equity owner can ultimately vote (and accordingly replace) the members of a portfolio company’s board of directors, the opportunities to actively engage as a fixed income investor tend to occur around events such as new debt issuances and corporate restructurings. In such cases, depending on the size of the position held by the Sub-fund relative to the total class of debt, the Sub-Manager may be able to exert some degree of influence over an issuer, particularly with respect to governance and reporting issues but also more broadly environmental and social issues as appropriate. The Sub-Manager’s active approach to fixed income investing generally includes frequent interaction with company management, as it seeks to keep an open line of communication with respect to actions that could negatively impact the value of the investment made by the Sub-fund. While the Sub-Manager does not always agree with the policies implemented by an issuer’s management, it believes that remaining active and engaged will typically result in more constructive, long-term relationships surrounding topical issues, including ESG concerns.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

● ***How did this financial product perform compared with the broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - GLOBAL CONCENTRATED EQUITY
 Legal entity identifier: 5493000B3NSRTXHRKR38

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in assets with good environmental, social and governance ratings while excluding certain companies because of their involvement in controversial products and services.

The Sub-Manager integrates ESG considerations in their investment process which is focused on quality-specially, sustainable earnings over an economic cycle-and risk

mitigation-modelling downside risk as much as upside returns and demanding a spread between value and price. As a result, the Sub-Manager believes this creates portfolios of sustainable businesses with compelling carbon and ESG risk scores. The Sub-Manager considers that buying high quality companies at compelling valuations is foundational to long-term investment success.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-Manager seeks to achieve a portfolio Carbon Risk Score as measured by the Sub-Manager methodology lower than 10 on a scale from 0 (negligible) to 50 and above (severe).

As at 30 December 2023, the Carbon Risk score was 6.1.

The Carbon Risk rating quantifies the company's exposure and management of material carbon issues in its own operations as well as its products and services. At each value chain stage, a company's vulnerability to carbon risks is assessed. This is followed by an assessment of how much of this risk is manageable as opposed to systemic, with a final step of evaluating the degree to which management policies are already in place.

● ***...and compared to previous periods?***

As at 30 December 2022, the Carbon Risk score was 6.2.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

— — How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the average Carbon Footprint was 50.4 T CO₂ Emission/mln\$ Sales.

2. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country
SAMSUNG ELECT-GDR	Technology	6,74%	KOREA

CVS HEALTH CORP	Health Care	3,8%	USA
CANADIAN PACIFIC KANSAS CITY USD	Industrials	3,76%	CANADA

What was the proportion of sustainability-related investments?

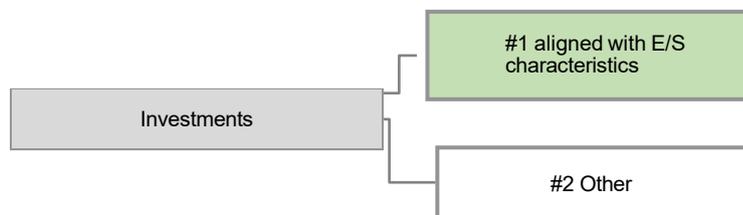

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● *What was the asset allocation?*

As at 31 December 2023:

98.3% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

1.7% of the Sub-Fund's assets were invested in #2 Other.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo % PTF
Technology	20,93%
Health Care	18,36%
Industrials	16,28%
Financials	14,71%
Communications	12,69%
Consumer Staples	8,61%
Consumer Discretionary	3,59%
Real Estate	3,16%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes
 - In fossil gas
 - In nuclear energy
- No

● **What was the share of investments made in transitional and enabling activities?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

These investments do not follow minimum environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Joint Engagement Initiatives

- Endorsed the UNPRI Spring Initiative, a TNFD-aligned initiative
- UNPRI Railway agreement

Engagement Example: MillerKnoll

On April 19, 2023, a video went viral (over 24 million views within 2 days) of MLKN CEO Andi Owens’ comment to employees to ‘leave Pity City’ after some asked about staying motivated if employees did not receive bonuses this year. The average MLKN employee receives \$45,000 salary. CEO Andi Owen received a \$1.1 million salary with a \$3.9 million in stock awards and other compensation for fiscal year ending May 2022, according to most recent MLKN proxy statement. The compensation received by MLKN CEO in 2022 is in-line with its peer group. After the viral video, CEO Andi Owen sent an email to staff stating, “I feel terrible that my rallying cry seemed insensitive...What I’d hoped would energize the team to meet a challenge we’ve met many times before

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

landed in a way that I did not intend and for that I am sorry.” MLKN has not yet decided on bonus payouts for staff, including its CEO, as its fiscal year ends in May.

Sub-Manager(Scharf Investments) Engagement: In response to remarks MLKN CEO Andi Owen made as a part of an online meeting with workers, Scharf Investments engaged MLKN over the topic of compensation. On April 27, 2023, President and Investment Committee Chairman, Brian Krawez, and Senior Research Associate, Grace Menk, sat down with MLKN CFO, Jeffrey Stutz, and Vice President of Investor Relations, Carola Mengolini, to discuss the circumstances surrounding the CEO’s remarks and underlying compensation plans. We learned that Andi has been doing smaller group fireside chats within the company after the video went viral. Managers within the company are also talking to their employees to gauge morale. Scharf Investments engaged with the company on this issue and felt that outreach within the organization was a positive step in the right direction to reengaging employees.

2023 Company Engagement Summary

Company Name	Type	Topic	Date of Engagement	Response or follow-up
U.S. Railway Industry	UNPRI Collaboration	Sick Leave	1/20/2023	
MillerKnoll	Individual	Controversy - Social	5/1/2023	Quarterly engagement
Lockheed Martin	Individual	Controversy - Social	10/9/2023	Followed up, no response.
Samsung	Individual	Controversy - Governance	10/9/2023	Followed up, no response.
U-Haul	Individual	Carbon Emissions	10/9/2023	

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- **How does the reference benchmark differ from a broad market index?**
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable as a reference benchmark has not been selected by the Sub-fund.

Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - GLOBAL DIVERSIFIED INCOME Legal entity identifier: 5493000EQZSDQB45FQ35

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager's view on sustainable development.

The Sub-Manager believes that responsible investment practices incorporating an assessment of ESG factors adds sustainable value for the Sub-fund's investors by mitigating risk and positively influencing long- term financial performance.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve an ESG Quality Score, as measured by the Sub-Manager methodology, in the first tercile of the score range (i.e. at least equal to 6.67 on a range from 0 to 10).

In 2023, the ESG Quality Score of the portfolio based on the Sub-Manager's data provider report was 6.9 out of 10. The portfolio ESG Quality Score score is a compounded score adjusted by industry, momentum and overall rating distribution.

● ***...and compared to previous periods?***

In 2022, the ESG Quality Score of the portfolio based on the Sub-Manager's data provider report was 7.7 out of 10. The portfolio ESG Quality Score score is a compounded score adjusted by industry, momentum and overall rating distribution.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint was on average 40.2 T CO₂ Emission/mln\$ Sales.

2. Exposure to companies active in the fossil fuel sector:

In 2023 on average, 2% of the portfolio’s weight had involvement in fossil fuels. At the end of 2022, one company in the Utilities sector and one in the Industrials sector are generating this exposure. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services. If this percentage is positive for a company, the total weight of exposure to this company is taken into account in the measure, even if the percentage of revenue is small.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

In 2023, 0% of the Sub-Fund’s assets were exposed to companies which are in violation of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country
US TSY 3.875% 08/33	Government	6,72%	USA

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

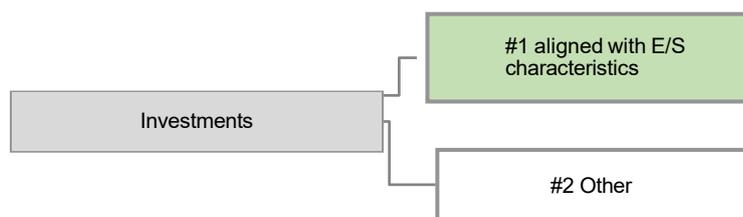

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● *What was the asset allocation?*

As at 31 December 2023:

100% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

0% of the Sub-Fund's assets were invested in #2 Other.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● *In which economic sectors were the investments made?*

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo% (PTF)
Materials	2,79%
Communications	2,85%
Financials	2,91%
Industrials	3,0%
Consumer Discretionary	3,2%
Consumer Staples	4,98%
Health Care	6,81%
Technology	9,11%
Other	64,35%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas

In nuclear energy

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments, units in collective investment schemes as well as derivatives that have been included in the portfolio in order to manage it efficiently, to protect its assets and liabilities and for investment purposes.

These investments do not follow minimum environmental and social safeguards.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As part of its strategy, the Sub-Manager may engage in dialogue with companies about ESG-related disclosures to better understand how potential ESG risks and opportunities are managed, among issues. While the Sub-manager does not take an activist position, the investment team may engage with company management in conversations about ESG-related disclosures to help the companies further enhance their knowledge of ESG risks and take action to reduce their environmental and social impacts.

In addition, the Sub-Manager actively monitors voting opportunities at its companies for potential governance and other ESG risks and while it has the ability to vote proxy, it hardly does it as it is uncommon within this space.

The Sub-Manager has chosen to delegate its shareholder engagement to ISS Governance, which manages and executes votes. However, the procedure allows the Sub-Manager to modify ISS votes; the final decision rests solely with the Sub-Manager.

In 2023, the Sub-Manager participated in 24 corporate actions for the Fund and another compartment of iMGP. Its votes were in agreement with management recommendations 77% of the time. Nevertheless, on some occasions, the Sub-Manager voted against management. For example, it voted against numerous proposals from Amazon, Alphabet, Microsoft, or Coca-Cola at their respective annual general meetings on issues such as tax transparency reports, climate lobbying, gender/racial pay gaps, climate change strategy, civil rights audits, tax transparency reports, among others.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - JAPAN OPPORTUNITIES Legal entity identifier: 5493000GULN3XEIXOZ68

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager's view on sustainable development.

The Sub-Manager believes that companies which take account of ESG factors in their own strategies and operating models have a greater likelihood of obtaining sustainable profits over time, and thus of increasing their value, both in economic and financial terms.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve an ESG Score, as measured by the Sub-Manager methodology, higher than that of its investment universe (known as “ESG Score Integration”).

In 2023, the ESG Score of the portfolio was 7.4. The ESG score of the Topix index was 7.0.

The Sub-Manager has integrated procedures to measure the carbon dioxide (CO₂) emissions generated by issuers, in order to build a portfolio with a carbon footprint lower than that of its investment universe. During the period under review, carbon footprint of the Sub-fund was 41.9 TC02 Emission/mln\$ Sales whereas that of the Topix index is 89.3 TC02 Emission/mln\$ Sales.

● ***...and compared to previous periods?***

In 2022, the ESG Score of the portfolio was 6.8. The ESG score of the Topix index was 6.7.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint was on average 41.9 TC02 Emission/mln\$ Sales whereas that of the Topix index was 89.3 TC02 Emission/mln\$ Sales.

2. Exposure to companies active in the fossil fuel sector:

In 2023, 0.1% of the portfolio’s weight had on average involvement in fossil fuels. At the end of 2023, no company in the portfolio had any exposure. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services. If this percentage is positive for a company, the total weight of exposure to this company is taken into account in the measure, even if the percentage of revenue is small.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

In 2023, 0% of the Sub-Fund’s assets were exposed to companies which are in violation of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

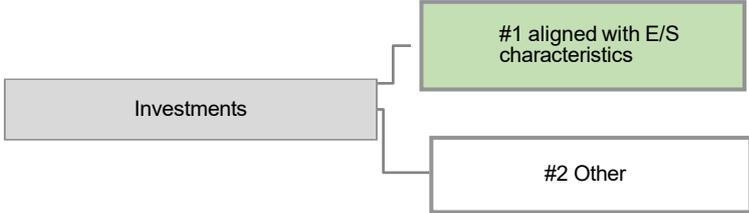

As at 31 December 2023:

95.1% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

4.9% of the Sub-Fund's assets were invested in #2 Other.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo % PTF
Technology	23,16%
Industrials	17,98%
Consumer Discretionary	17,86%
Consumer Staples	11,34%
Financials	10,23%
Communications	8,37%
Materials	3,51%
Health Care	2,65%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective –

Yes

In fossil gas In nuclear energy

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

These investments do not follow minimum environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Overview of engagement activity

2023

65

Total number of Engagements

44

Issuers "engaged"

The Sub-Manager, Eurizon Capital SGR SpA, defines "engagement" as the dialogue with investee companies deemed "relevant" according to qualitative/quantitative criteria set by internal regulations, in order to involve them in a medium/long-term relationship, with the aim of monitoring and determining commitments by these companies on specific issues, as well as participation in the relevant Shareholders' Meetings. The prerequisites of engagement activities, therefore, are involvement, relationship and commitment. The engagement methods used by Eurizon are:

"One way" - (or unilateral, in which one of the two parties starts communication in order to inform the other about a specific issue);

"Two way" - (or bilateral, in which both parties constructively interact in order to mutually monitor the topics covered by the meeting);

"Collettivo" - (which envisages the coordinated action of several investors towards a specific issuer regarding targeted issues through (i) participation in the activities of the Corporate Governance Committee and the Investment Managers' Committee promoted by Assogestioni; (ii) initiatives jointly promoted with other investors (i.e. IIGCC and PRI)).

Engagements can be carried out through conference call, webcast presentation, letters and, when possible, in-person meetings.

As provided by the Engagement Policy, Eurizon Capital SGR has a fiduciary duty aimed at safeguarding and creating value for its Clients and Investors, which require to effectively address issues related to companies in which invests on behalf of Clients. Eurizon believes that those issuers that implement high environmental, social and corporate governance standards are able to generate sustainable performance over the long term; for this reason, ESG issues are given special attention by Eurizon.

In this context, "critical" issuers are defined as those companies characterized by a higher exposure to environmental, social and corporate governance risks i.e., having a lower ESG sustainability rating level (equal to "CCC" assigned by the specialized info-provider "MSCI ESG Research") in the equity and bond investment universe. For "critical" issuers, Eurizon has defined a specific escalation process, as detailed in its Sustainability Policy.

In addition, it is specified that the engagement can be activated as follows:

- Upon Eurizon's portfolio managers initiative;
- Upon the ESG & Strategic Activism initiative;
- Through Assogestioni collective initiative;
- In collaboration with international association.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform compared with the broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - MULTI ASSET ABSOLUTE RETURN Legal entity identifier: 549300TZ2K4ZLL8RCQ52

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager's view on sustainable development.

The Sub-Manager believes that responsible investment practices incorporating an assessment of ESG factors adds sustainable value for the Sub-fund's investors by mitigating risk and positively influencing long- term financial performance.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve an ESG Quality Score, as measured by the Sub-Manager methodology, in the first tercile of the score range (i.e. at least equal to 6.67 on a range from 0 to 10).

In 2023, the ESG Quality Score based on the Sub-Manager's data provider report was 7.7 out of 10. The ESG Quality Score is a compounded score adjusted by industry, momentum and overall rating distribution.

● ***...and compared to previous periods?***

In 2022, the ESG Quality Score based on the Sub-Manager's data provider report was 7.4 out of 10. The ESG Quality Score is a compounded score adjusted by industry, momentum and overall rating distribution.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint of the Sub-fund was on average 66.8 T CO₂ Emission/mln\$ Sales.

2. Exposure to companies active in the fossil fuel sector:

In 2023, 7.4% of the portfolio’s weight had on average involvement in fossil fuels. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services. . If this percentage is positive for a company, the total weight of exposure to this company is taken into account in the measure, even if the percentage of revenue is small.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

In 2023, 0% of the Sub-Fund’s assets were exposed to companies which are in violation of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country
BTPS IT 1.4% 05/25 ICPI	Government	4,88%	ITALY
KFW 0% 02/25 EMTN	Government	3,92%	GERMANY
IMGP STABLE RETURN R USD	Cash & Others	3,54%	LUXEMBOURG
ISHARES PHYSICAL GOLD ETC (USD)	Cash & Others	3,28%	IRELAND
FINLAND 2.875% 04/29	Government	3,04%	FINLAND
KFW 2.75% 03/28 EMTN	Government	3,03%	GERMANY

ESM 0% 12/24	Government	1,75%	SUPRANATIONAL

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

As at 31 December 2023:

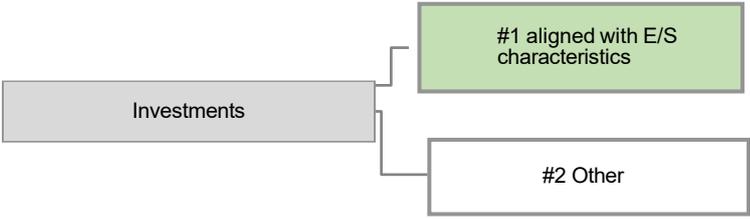

100% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

0% of the Sub-Fund's assets were invested in #2 Other.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● *In which economic sectors were the investments made?*

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo% (PTF)
Communications	1,73%
Materials	1,9%
Consumer Discretionary	2,03%
Consumer Staples	3,41%
Health Care	4,94%
Technology	5,69%
Other	80,3%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas In nuclear energy

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments, units of collective investment schemes as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

These investments do not follow minimum environmental and social safeguards.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As part of its strategy, the Sub-Manager may engage in dialogue with companies about ESG-related disclosures to better understand how potential ESG risks and opportunities are managed, among issues. While the Sub-manager does not take an activist position, the investment team may engage with company management in conversations about ESG-related disclosures to help the companies further enhance their knowledge of ESG risks and take action to reduce their environmental and social impacts.

In addition, the Sub-Manager actively monitors voting opportunities at its companies for potential governance and other ESG risks and while it has the ability to vote proxy, it hardly does it as it is uncommon within this space.

The Sub-Manager has chosen to delegate its shareholder engagement to ISS Governance, which manages and executes votes. However, the procedure allows the Sub-Manager to modify ISS votes; the final decision rests solely with the Sub-Manager.

In 2023, the Sub-Manager participated in 24 corporate actions for the Fund and another compartment of iMGP. Its votes were in agreement with management recommendations 77% of the time. Nevertheless, on some occasions, the Sub-Manager voted against management. For example, it voted against numerous proposals from Amazon, Alphabet, Microsoft, or Coca-Cola at their respective annual general meetings on issues such as tax transparency reports, climate lobbying, gender/racial pay gaps, climate change strategy, civil rights audits, tax transparency reports, among others.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform compared with the broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - STABLE RETURN
 Legal entity identifier: 222100204TEISV1YH245

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager’s view on sustainable development.

The Sub-Manager believes that responsible investment practices incorporating an assessment of environmental, social and governance (ESG) factors adds sustainable value

for investors by mitigating risk and positively influencing long-term financial performance, consistent with its fiduciary duty.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

According to the ESG policy, each invested security in the non-derivatives portfolio will be subject to a thorough assessment based on a variety of ESG factors provided by external sources and possibly complemented by the Sub-Manager internal research.

Regarding government issuers, the methodology which is used relies on UN SDGs alignment through a score from 0 to 100. The portfolio securities score (excluding financial derivative instruments) should be higher than the average of the relevant issuers' universe.

In 2023, the score of the portfolio is 75.9 whereas the average score of the universe is 67.5.

● ***...and compared to previous periods?***

In 2022, the score of the portfolio is 74.6 whereas the average score of the universe is 67.2.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Exposure to companies active in the fossil fuel sector:

In 2023, 0% of the portfolio’s weight had involvement in fossil fuels.

2. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

TBIP USA 01/02/24	Government	14,65%	USA
TBIP USA 25/01/24	Government	10,60%	USA
TBIP USA 09/05/24	Government	10,46%	USA

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

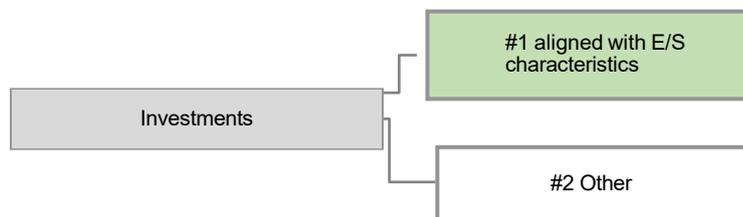

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

As at 31 December 2023:

78% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

22% of the Sub-Fund's assets were invested in #2 Other.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● *In which economic sectors were the investments made?*

As at 31 December 2023, the non-derivatives securities in the portfolio are entirely invested in the Government Sector.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

What was the share of investments made in transitional and enabling activities?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, deposits or similar instruments as well as derivatives, including FX derivatives for share class hedging purpose. Positions in

Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP – SUSTAINABLE EUROPE

Legal entity identifier: 549300XUHN5CD5XSKQ73

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 61.77%</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input checked="" type="checkbox"/> It made sustainable investments with a social objective: 37.65%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent was the sustainable investment objective of this financial product met?

The investment objective of the Sub-fund is to achieve capital growth over 5 years, by investing in the shares of European companies that provide solutions to sustainability challenges and falling within the following sustainable investment themes set by the Sub-Manager: (1) cleaner energy, (2) environmental services, (3) resource efficiency, (4) sustainable transport, (5) water management, (6) education, (7) health, (8) safety and (9) well-being.

The primary focus of the investment objective is sustainable investment (although capital growth is measured alongside). No benchmark has been selected to measure attainment of this objective, due to lack of availability of a suitably aligned benchmark for this strategy.

The investments made by the Sub-fund complied fully with this objective for the duration of the period under review.

● ***How did the sustainability indicators perform?***

The Sub-Manager assessed the Sub-fund's portfolio on four main factors on a continuous basis: avoiding social harm; avoiding environmental harm; achieving social good; delivering environmental good. Against the "achieving social good" and "delivering environmental good" factors, the Sub-Manager measured a set of core indicators that relate directly to the sustainable investment objective of the Sub-fund. These core indicators include: carbon avoided (tonnes), renewable energy generated (MWh) waste recovered or recycled (tonnes), water treated / use avoided (litres), people receiving healthcare treatment (no. of patients). In addition, the Sub-Manager on occasion utilised additional non-core indicators to cover portfolio companies invested in as at the reporting date.

Using the most recently available data (based on the latest data as at 17 April 2024) an investment of €1m in 2023 was associated with:

- 216tCO₂e was avoided. This is equivalent to the electricity use of 121 average European homes for one year and saving €10,724 in avoided carbon costs.
- 417 MWhs of renewable energy was generated. This is equivalent to the annual electricity use of 36 European households.
- 28t of waste was recycled or recovered. This is equivalent to the annual waste produced by 25 European households and saving €2,458 in avoided landfill costs.
- Saving 348,740 litres of water. This is equivalent to the water used by 5,624 showers.
- 116 people receiving healthcare treatment.
- €22,066 spent on products and services supplied by companies in the strategy and used in healthcare R&D.

● ***...and compared to previous periods?***

These reported impact numbers vary year on year for a number of reasons. This includes the increasing impact associated with growing sales of products and services that have a positive impact, changes in portfolio holdings and changes in the position size of companies held in the strategy throughout the period.

In general, environmental performance improved year on year. For example the amount of avoided carbon associated with a €1m investment in the strategy increased from 197tCO₂e to 215tCO₂e. The amount of renewable energy generated also increased from 328MWhs to 417MWhs. The litres of water saved also increased from 287,624 litres of water to 348,740 litres of water.

Equally however, the numbers of patients treated declined from 174 to 116.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

These changes are primarily due to the changing allocations to the different social and environmental themes within the fund and are within the range of impacts that we hope to achieve.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The investment process analysed and assessed potential negative impacts at the product level (significant social and environmental impact). The Sub-Manager also integrated analysis of material ESG issues into its assessment of a company's operations using a Sustainable Accounting Standards Board (SASB) - derived framework and utilised third party screening to ensure portfolio holdings were in compliance with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. SASB standards highlight key sustainability information that is reasonably likely to affect the financial performance of a company within an industry. The Sub-fund's thematic structure means that it was largely absent from heavy footprint sectors which have a material environmental or social impact. The Sub-Manager did not invest in companies that would offend the Do No Significant Harm (DNSH) material criteria for the business as a whole. The DNSH criteria ensures that no portfolio company would significantly harm any of the six environmental objectives within the EU Taxonomy Regulation.

These six objectives are: climate change mitigation; climate change adaptation; sustainable use and protection of water and marine resources; circular economy; pollution prevention and control and; protection and restoration of biodiversity and ecosystems.

The investment process as detailed above was applied for the duration of the period with no exceptions to report.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Each potential investment in the portfolio was subject to analysis of adverse impact indicators. The investment process analysed adverse impact indicators both at the product level as well as from company operations in order to assess each company against the DNSH criteria. The Sub-fund's strategy focuses on companies that sell products and services that provide solutions to sustainability challenges which means that the Sub-Manager considered adverse impacts from products as part of its overall assessment of the positive impact intensity of the products and services being supplied. For operational impacts, the Sub-Manager considered the range of environmental and social issues that are considered to be material to that particular business.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes. The investment process applied uses third party screening to ensure that portfolio holdings were in compliance with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Sub-Manager confirms that the sustainable investments were aligned with both the Guidelines and Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Principal adverse impacts were considered in the application of the Sub-Manager's investment process; the Sub-fund's thematic structure means that it was largely absent from sectors with major social and environmental impacts. Nonetheless, the Sub-Manager systematically integrated analysis of material ESG issues into its fundamental stock level analysis.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

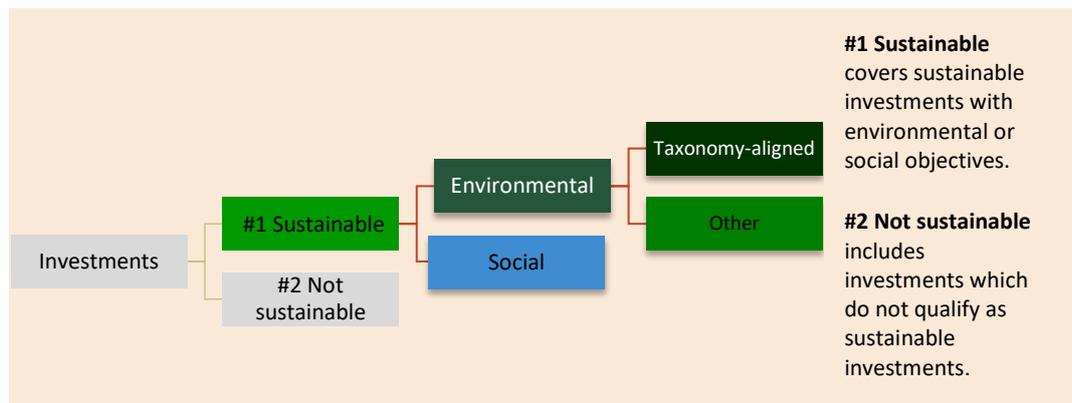

Largest investment	Sector	% Assets	Country
SWECO AB	Industrials	4.85%	SWEDEN
INFINEON TECH AG	Technology	4.76%	GERMANY

STMICROELECTRONICS NV	Technology	4.38%	NETHERLANDS
GENMAB A/S	Health Care	3.45%	DENMARK

What was the proportion of sustainability-related investments?

The asset allocation is mostly in sustainable listed equities, with the remainder in cash and derivatives, as further described below. At all times the portfolio of listed equities will represent 100% of sustainable investments.

● What was the asset allocation?

As at 31 December 2023:

- 99.5% of the Sub-fund's assets were invested in Sustainable listed equities, out of which:

- 61.77% related to securities having an environmental objective

- 37.65% related to securities having a social objective

10.4% of Sustainable investments are considered aligned with the EU Taxonomy, as developed further below.

- 0.5% of the Sub-fund's assets were invested in Not sustainable securities, which includes cash and derivatives.

● In which economic sectors were the investments made?

As at 31 December 2023, the Sub-fund's investments were made in the following economic sectors:

Sectors	Expo %
Industrials	33.79%
Health Care	33.54%
Technology	17.72%
Materials	9.65%
Consumer Discretionary	2.16%

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Cash & Others

0.46%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The percentage of Taxonomy aligned investments which contribute to the environmental objectives set out above complied with the Sub-fund's minimum target of at least 5%, calculated using company turnover.

The Sub-Manager expects that this figure will increase significantly over time as more data becomes available, and is calculated through a combination of internal research and verifiable third party sources.

The areas that the Sub-fund invested in that the Sub-Manager considers to be in environmentally sustainable economic activities include: Cleaner Energy such as wind and solar power, Environmental Services such as circular economy activities and the manufacture of sustainable materials, Resource Efficiency as such as energy efficient products, efficient buildings and efficient manufacturing technologies, Sustainable Transport including battery electric vehicles (BEVs) and infrastructure for BEVs, and Water Management such as wastewater treatment products and services.

The Sub-fund also invests in economic activities that the Sub-Manager considers to have a positive social impact. This includes in Education such as education technologies and provision, Health such as medical devices and therapies, Safety including products that keep people safe and that ensure products and services are safe, and Well-being covering activities supporting healthy eating, exercise and products and services supporting hearing, vision and oral health.

Not all these areas are covered by the current Taxonomy which only extends to two of the six environmental objectives. Furthermore, many of the Sub-fund's investments are in companies developing components that enable downstream carbon emission reductions. It is not currently clear whether all of these types of components are taxonomy eligible even though independent sources confirm that real world emission reductions are enabled by them.

The Sub-Manager has selected revenue as the KPI for assessing Taxonomy eligibility because it believes this is the most accurate way of assessing a business's current exposure to taxonomy eligible activities. The Sub-Manager believes that this is relevant to the Sub-fund investors for the same reason. The Sub-fund's investment proposition to investors is that it will invest in companies providing solutions to sustainability challenges. For over 17 years the Sub-Manager has used revenues to measure this and believe that it provides the most legitimate basis on which to judge whether a company is focused on delivering solutions to sustainability challenges.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas

In nuclear energy

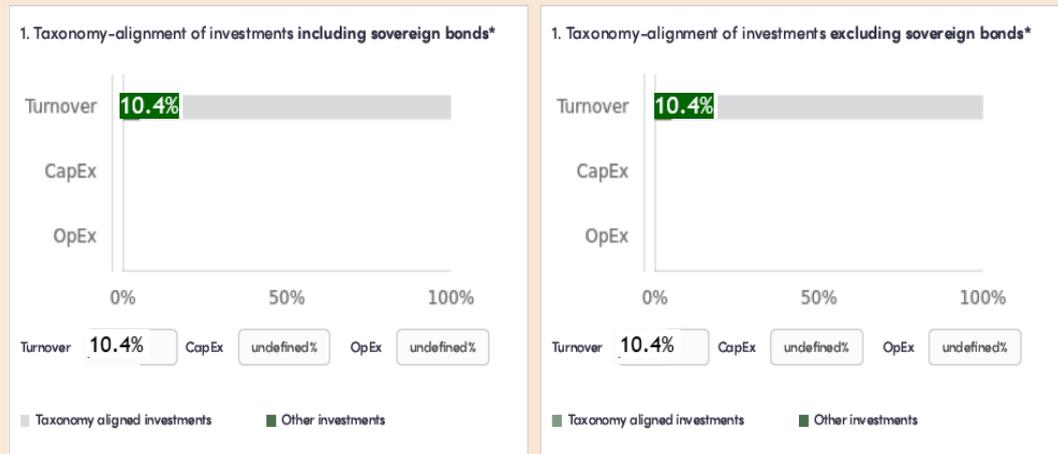

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

100% of Taxonomy aligned investments made would be considered as enabling. Investments made during the year complied with the minimum target of 5%, calculated using company turnover, which is expected to increase significantly over time as more data becomes available.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

In 2023, such percentage increased as at the end of 2022, the percentage of investments aligned with the EU Taxonomy was 5%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As at 31 December 2023, 89.6% of the Sub-fund's sustainable investments were not aligned with the EU Taxonomy (based on company turnover).

The proportion of taxonomy aligned investments is expected to increase over time as more data becomes available. The EU Taxonomy however, is currently only focused on two of six environmental objectives (as of the date this report refers to, this is, end of December 2023). The investments, for example, in circular economy businesses, and businesses that sell products and services that treat wastewater and protect the aquatic environment are not covered by the current Taxonomy which is focused on climate change mitigation and adaptation. For these companies, while clearly delivering a positive environmental impact, there is no taxonomy that is available to align with. In addition, the strategy of the Sub-fund is invested in businesses that operate outside of the European Union. These businesses do not typically comply with detailed product standards that are specific to the European Union and referenced in the EU Taxonomy. The Sub-Manager does not generally consider these companies to be taxonomy aligned

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

even where the products and services clearly deliver a positive environmental impact. Finally very few companies even in the European Union have yet published detailed accounts of their taxonomy alignment. The Sub-Manager would expect its overall alignment to increase over time once more data is available.

What was the share of socially sustainable investments?

All social themes in the Sub-fund have a social objective, and 37.65% of the Sub-fund's investments were in social themes.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“Not sustainable” includes the remaining investments of the financial product which are not qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives. These investments do not follow minimum environmental and social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Sub-Manager's mission is to advance sustainability and create prosperity through positive impact investments. The Sub-Manager is an active owner of the companies that the Sub-fund invests in and integrates environmental, social and governance (ESG) issues into its ownership policies and practices.

The Sub-Manager engagement activity with companies is driven fundamentally by a desire to understand them better, and to advocate for practices that it believes will help secure the company's long-term success.

In addition, the Sub-Manager's proxy voting policies are intended to promote long-term shareholder value creation and risk mitigation at portfolio firms through support for responsible global corporate governance practices. The Sub-Manager's approach is based on a set of four core principles that apply globally: accountability, stewardship, independence and transparency.

Substantially all the work the Sub-Manager does during the year is focused on attaining the Sub-fund's sustainable investment objective.

In 2023, the Sub-Manager carried out various engagements with investee companies, details of which are available upon request.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable as no specific index has been designated as a reference benchmark to meet the sustainable investment objective.

- ***How did the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - US CORE PLUS

Legal entity identifier: 549300ZZ7E14E90HD820

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in assets with good environmental, social and governance (“ESG”) ratings while excluding certain companies because of the extent of their involvement in controversial products and services.

The Sub-Manager believes that responsible investment practices incorporating an assessment of ESG factors adds sustainable value for the Sub-fund’s investors by mitigating risk and positively influencing long- term financial performance.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve a Carbon Risk Score, as measured by the Sub-Manager methodology, lower than 10 on a scale from 0 (negligible) to 50+ (severe).

As at 31 December 2023, the Carbon Risk score of the Sub-fund is 6.7.

The Carbon Risk rating quantifies the company's exposure and management of material carbon issues in its own operations as well as its products and services. At each value chain stage, a company's vulnerability to carbon risks is assessed. This is followed by an assessment of how much of this risk is manageable as opposed to systemic, with a final step of evaluating the degree to which management policies are already in place.

● ***...and compared to previous periods?***

As at 31 December 2022, the Carbon Risk score of the Sub-fund is 8.2.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the average Carbon Footprint was 52.5 TC02 Emission/mln\$ Sales.

2. Exposure to companies active in the fossil fuel sector:

In 2023, 0% of the portfolio’s weight has involvement in fossil fuels. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country
QVCN 4.45% 2/25	Consumer Discretionary	2,64%	USA

ORCL 6.25% 11/32	Technology	2,16%	USA
TRMB 4.9% 06/28	Industrials	2,14%	USA
DISCA 3.95% 03/28	Communications	2,14%	USA

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● What was the asset allocation?

As at 31 December 2023:

99.6% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

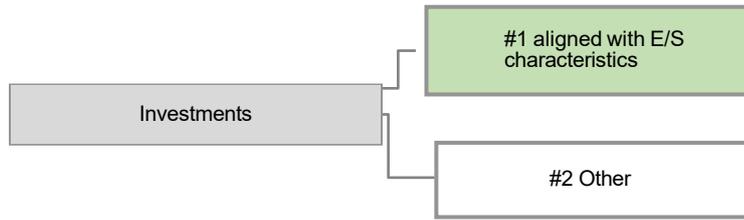

0.4% of the Sub-Fund's assets were invested in #2 Other.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo % PTF
Consumer Discretionary	18,45%
Technology	17,74%
Communications	13,7%
Industrials	12,58%
Financials	9,21%
Materials	8,36%
Health Care	8,25%
Consumer Staples	8,16%
Government	3,15%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes
 - In fossil gas
 - In nuclear energy
- No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

 **What was the share of socially sustainable investments?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently, to protect its assets and liabilities and for investment purposes.

These investments do not follow minimum environmental and social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

As part of its strategy, the Sub-Manager may engage in dialogue with companies about ESG-related disclosures to better understand how potential ESG risks and opportunities are managed, among issues. While the Sub-manager does not take an activist position, the investment team may engage with company management in conversations about ESG-related disclosures to help the companies further enhance their knowledge of ESG risks and take action to reduce their environmental and social impacts.

In addition, the Sub-Manager actively monitors voting opportunities at its companies for potential governance and other ESG risks and while it has the ability to vote proxy, it hardly does it as it is uncommon within this space.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - US HIGH YIELD
 Legal entity identifier: 54930030NV1S958BSH35

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager’s view on sustainable development.

The Sub-Manager views ESG integration as a holistic assessment of the relationships a company has with its key stakeholders and its ability to serve them now, and into the

future. The Sub-Manager believes businesses that thoughtfully balance the interests of key stakeholders, including employees, customers, suppliers and other business partners, communities, and the environment, while uniquely delivering the value they seek are positioned to deliver sustainable outcomes. The consideration of material ESG factors in its investment process is aligned with its fiduciary duty and supports the Sub-Manager’s aim to deliver attractive risk-adjusted returns to the Sub-fund’s shareholders.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, who may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Sub-Manager seeks to achieve a portfolio with a lower carbon intensity than that of the US Non-Financial High Yield market, as measured by the Sub-Manager methodology. The Sub-Manager will also monitor the carbon intensity of individual issuers (where such information is available).

As at 30 December 2023, the Carbon Intensity score is 189 tons/USD millions in sales, while the Carbon Intensity score of the US Non-Financial High Yield market is 278 tons/USD millions in sales.

● **...and compared to previous periods?**

As at 30 December 2022, the Carbon Intensity score is 194 tons/USD millions in sales.

Sector Contribution to Portfolio and Benchmark Carbon Intensity	Weight Diff	Portfolio	Benchmark	Contrib Diff

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

- — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

- — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint

As at 30 December 2023, the Carbon Footprint of the Sub-fund is 189 tons/USD millions in sales, while the Carbon Footprint of the US Non-Financial High Yield market is 278 tons/USD millions in sales.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

<u>Sector Contribution to Portfolio and Benchmark Carbon Intensity</u>	<u>Weight Diff</u>	<u>Portfolio Contribution</u>	<u>Benchmark Contribution</u>	<u>Contrib Diff</u>
Automotive	-1.3%	1	1	-1
Banking	0.0%	0	0	0
Basic Industry	6.9%	59	27	32
Capital Goods	-2.4%	15	9	5
Consumer Goods	-0.4%	3	3	0
Energy	1.3%	75	85	-10
Financial Services	0.0%	0	0	0
Healthcare	-1.6%	4	3	0
Insurance	1.1%	0	0	0
Leisure	-2.7%	21	34	-14
Media	2.1%	1	3	-2
Real Estate	1.1%	5	3	2
Retail	-0.6%	2	1	0
Services	-3.2%	0	10	-9
Technology & Electronics	1.1%	3	2	1
Telecommunications	-0.3%	2	3	-1
Transportation	-2.2%	0	16	-16
Utility	0.3%	1	78	-77
Total		189	278	-89

Estimated carbon intensity represents a company's most recently reported or estimated Scope 1 (e.g., direct) + Scope 2 (e.g., indirect) greenhouse gas emissions normalized by sales in USD (metric tons Carbon Dioxide Equivalent, or CO2E/USD millions in sales), which allows for comparison of carbon intensity between companies of different sizes.

2. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund's assets were exposed to controversial weapons.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country
CMPR 7% 06/26	Consumer Discretionary	4,07%	IRELAND
PSDO 8.25% 02/28 144A	Technology	4,02%	USA

RZNCAN 9.375% 05/29 144A	Consumer Discretionary	2,15%	USA

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

As at 31 December 2023:

97.9% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

2.1% of the Sub-Fund's assets were invested in #2 Other.

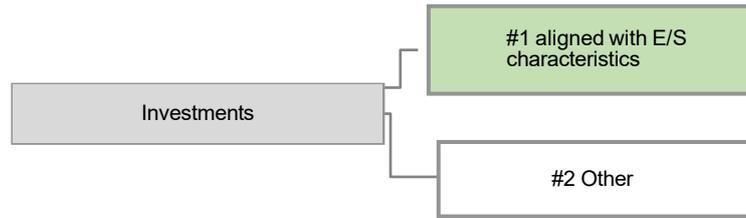

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo % PTF
Consumer Discretionary	18,67%
Communications	17,62%
Energy	14,34%
Industrials	10,31%
Technology	8,88%
Materials	8,63%
Health Care	6,46%
Financials	5,4%
Utilities	3,97%
Consumer Staples	3,6%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas

In nuclear energy

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments and there are no reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently, to protect its assets and liabilities and for investment purposes.

These investments do not follow minimum environmental and social safeguards.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Manager believes that issuer engagement as a debt holder tends to be more indirect when compared to that of an equity owner. While an equity owner can ultimately vote (and accordingly replace) the members of a portfolio company's board of directors, the opportunities to actively engage as a fixed income investor tend to occur around events such as new debt issuances and corporate restructurings. In such cases, depending on the size of the position held by the Sub-fund relative to the total class of debt, the Sub-Manager may be able to exert some degree of influence over an issuer, particularly with respect to governance and reporting issues but also more broadly environmental and social issues as appropriate. The Sub-Manager's active approach to fixed income investing generally includes frequent interaction with company management, as it seeks to keep an open line of communication with respect to actions that could negatively impact the value of the investment made by the Sub-fund. While the Sub-Manager does not always agree with the policies implemented by an issuer's management, it believes that remaining active and engaged will typically result in more constructive, long-term relationships surrounding topical issues, including ESG concerns.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - US SMALL AND MID COMPANY GROWTH
 Legal entity identifier: 54930001QZSSY530QY50

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager's view on sustainable development.

The environmental and/or social characteristics promoted by the Sub-fund are climate change initiatives, initiatives to improve environmental footprints and footprints and

positive agendas of stakeholders that may be involved in, or impacted by, an investee company.

The Sub-Manager views ESG integration as a holistic assessment of the relationships a company has with its key stakeholders and its ability to serve them now, and into the future. The Sub-Manager believes businesses that thoughtfully balance the interests of key stakeholders, including employees, customers, suppliers and other business partners, communities, and the environment, while uniquely delivering the value they seek are positioned to deliver sustainable outcomes. The consideration of material ESG factors in its investment process is aligned with its fiduciary duty and supports the Sub-Manager's aim to deliver attractive risk-adjusted returns to the Sub-fund's shareholders.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

Specific sustainability indicators have not been identified in the SFDR pre-contractual disclosures for the Sub-Fund for the period to which this report relates. Nevertheless, the Sub-Manager considers the below to be an important indicator for assessing the overall environmental and social profile of the Sub-Fund.

As at 31 December 2023, the Carbon Footprint of the Sub-fund was on average 14.1 TC02 Emission/mln\$ Sales.

● ***...and compared to previous periods?***

In 2022, the Carbon Footprint of the Sub-fund was on average 7.5 TC02 Emission/mln\$ Sales.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint of the Sub-fund was 14.1 TC02 Emission/mln\$ Sales.

2. Exposure to companies active in the fossil fuel sector:

In 2023, 0% of the portfolio’s weight has involvement in fossil fuels. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In 2023, 0% of the Sub-Fund's assets were exposed to companies which are in violation of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country
GLOBANT SA	Technology	5,95%	USD
DYNATRACE INC	Technology	5,08%	USD
HOULIHAN LOKEY INC	Financials	4,96%	USD
FIVE BELOW	Consumer Staples	4,49%	USD
GOOSEHEAD INSURANCE INC -A	Financials	4,05%	USD
TREX COMPANY INC	Materials	4,04%	USD
FLOOR & DECOR HOLDINGS INC	Consumer Discretionary	3,36%	USD
HAMILTON LANE INC-CLASS A	Financials	3,19%	USD
YETI HOLDINGS INC	Consumer Discretionary	3,12%	USD
WINGSTOP INC	Consumer Discretionary	3,01%	USD
MORNINGSTAR INC	Technology	2,98%	USD
ETSY INC	Consumer Discretionary	2,88%	USD

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

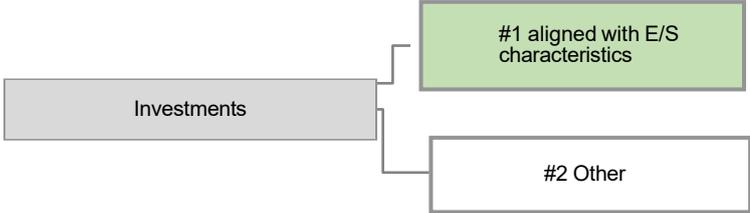

As at 29 December 2023:

98.2% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

1.8% of the Sub-Fund's assets were invested in #2 Other.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

As at 29 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Exposure %
Technology	34,78%
Consumer Discretionary	22,41%
Financials	12,2%
Health Care	10,75%
Industrials	7,86%
Consumer Staples	4,49%
Materials	4,04%
Communications	1,67%
Cash & Others	1,79%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas

In nuclear energy

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

These investments do not follow minimum environmental and social safeguards.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Engagement Approach

The Sub-Manager (“We”) engages companies throughout the lifecycle of its investment process. We start engaging company representatives at the onset of our research process before we add a company to our portfolios, all the way until we vacate our position in the holding. Our engagement approach, like our investment process, is holistic; we address all the aspects of the business, tackling diverse issues such as financial performance, risk management, corporate governance, competitive advantages, stakeholder issues and day-to-day business operations, to mention but a few. Any given call or meeting with the companies we own are thoughtfully curated to deliver sound understanding of any key questions that we might have on key topics, and more. As long-term quality investors, our proprietary flywheel investment process enables us to own sustainable businesses which we define as businesses that will generate long-term value to all its key stakeholders while delivering robust risk-adjusted returns. We thus engage companies on matters that are essential for them to maintain their market leadership positions and to thrive in dynamic markets and economic environments. As such, we engage our companies to keep updated on the health of the business’ various stakeholder groups, key business initiatives and of any other notable changes. For example, we may have questions about matters affecting customers, a key stakeholder group. As a result, we will ask questions or solicit information from company representatives on key customer issues like innovation and both product impact and quality. Additionally, we may also engage companies to discuss specific proxy issues and controversies we may have encountered in the investment research or monitoring process. Our engagement approach is enabled by the authentic relationships governed by transparency that we have cultivated with the representatives of our companies over time. We believe these engagements coupled with our rigorous and continuous research allow us to continue to make quality investment decisions with great conviction.

Calendar Year 2023 Activity

In 2023, the Small Company Growth team held approximately 49 meetings with company representatives of the businesses we own in the US SMID portfolio. In these meetings, we discussed multiple business issues which are assessed as part of our holistic sustainable investing framework. The following chart shows the business issues and the frequency at which they were discussed in company meetings in 2023:

	Frequency of discussion
Competitive Advantages	>55%
Financial Strength	>50%
Stakeholder and Value Proposition Assessment	>35%
Customer Issues	>30%
Mgmt, Board or Compensation Issues	>5%
Employee Issues	>5%
Other Governance Issues	>5%
Environmental Issues	>1%

Engagement Example - Doximity

Doximity is a productivity and professional network app for medical professionals hosting over 80% of the actively practicing physicians and 90% graduating medical students in the United States, according to the company's annual financial statement. The business generates revenue primarily from biopharmaceutical advertising. We engaged the company to assess the business' stakeholder and value proposition assessments in the highly dynamic Pharmaceutical digital advertising market. The competitive dynamics as well as the changes in that market in the post-pandemic era exposed some of that market's nuances. We discussed and gained a better understanding of the market but more importantly the strategic shifts happening in the industry and within the company. Doximity is pursuing initiatives to better suit its changing clients' needs including bringing a self-serve platform customers log into to see campaigns called the content hub, to the pharmaceutical side of the business. We also discussed the company's decision to reduce its workforce. Though both voluntary and involuntary attrition are normal and expected in business, as stakeholders we wanted to better understand the reasoning behind this reduction in the workforce. We learned that some of the employees were terminated because of their inferior performance. However, the company also admitted to having added too many people in charge of making content for pharma too quickly. The meeting's outcome was that we gained a better understanding of the dynamic Pharmaceutical digital advertising market. Briskly adding new talent into a new initiative in a highly dynamic industry was a mistake that the company learned from. It is through such engagements that we learn and identify areas of the business and aspects of the industry that we need to continue monitoring or learning about.

Engagement example - Fox Factory

Fox Factory designs, manufactures, and markets performance ride dynamics products for bicycles, motorcycles, terrain vehicles, snowmobiles, and other specialty vehicles. We engaged the company following the termination and departure of the CFO, Scott Humphrey. One of the key themes we explored was the significance of the culture of the firm which according to the CEO was the reason for the departure of the CFO. From this meeting we learned that Mr.Humphrey's technical skill was never in question and the company's financials were in great shape. The CFO's departure was important to preserve the culture of the firm because Mr. Humphrey's leadership style was not well aligned with that of the rest of the business. The consequence of that misalignment was that there was a growing gap or demarcation between the finance organization and the rest of the business.

The culture of a business is a great asset, and companies that care about both the technical needs and the cultural needs of the company should excel in the long term.

We believe these leaders of the company play a huge role in building and preserving a good culture. This is one example of a decision that one of our businesses made that shows that the company values its culture and uses the culture as a source of conviction to make the right albeit tough decision for the business. Following this call, we continued to monitor the business as the interim CFO stepped up to the role and then later when the company announced the new CFO, Dennis Schemm. Mr. Schemm has a great track record as a leader spanning more than two decades. Immediately preceding his start at Fox Factory, he was the CFO of Trex Company, Inc. We own Trex in our U.S SMID portfolio and we believe that the company's culture is great, which gives us confidence in Mr. Schemm.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform compared with the broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - US Value
 Legal entity identifier: 549300707CXZ8TRYKM19

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in assets with good environmental, social and governance ratings while excluding certain companies because of their involvement in controversial products and services.

The Sub-Manager integrates ESG considerations in their investment process which is focused on quality-specially, sustainable earnings over an economic cycle-and risk

mitigation-modelling downside risk as much as upside returns and demanding a spread between value and price. As a result, the Sub-Manager believes this creates portfolios of sustainable businesses with compelling carbon and ESG risk scores. The Sub-Manager considers that buying high quality companies at compelling valuations is foundational to long-term investment success.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-Manager seeks to achieve a portfolio Carbon Risk Score as measured by the Sub-Manager methodology lower than 10 on a scale from 0 (negligible) to 50 and above (severe).

As at 31 December 2023, the Carbon Risk score was 8.3.

The Carbon Risk rating quantifies the company's exposure and management of material carbon issues in its own operations as well as its products and services. At each value chain stage, a company's vulnerability to carbon risks is assessed. This is followed by an assessment of how much of this risk is manageable as opposed to systemic, with a final step of evaluating the degree to which management policies are already in place.

● ***...and compared to previous periods?***

As at 31 December 2022, the Carbon Risk score was 7.1.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

- — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023 the Carbon Footprint was on average 48.8 T CO₂ Emission/mln\$ Sales.

2. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country
MCKESSON CORP	Health Care	6,25%	USA
COMCAST CORP-CLASS A	Communications	5,87%	USA
BERKSHIRE HATHAWAY INC-CL B	Financials	5,71%	USA
BROOKFIELD CORP	Financials	5,08%	CANADA
MICROSOFT CORP	Technology	5,02%	USA
FISERV INC	Technology	4,94%	USA
MARKEL GROUP INC	Financials	4,51%	USA
HEINEKEN NV	Consumer Staples	4,45%	NETHERLANDS
CENTENE CORP	Health Care	4,41%	USA

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

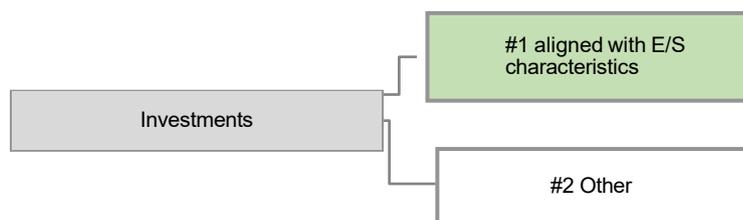

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

As at 31 December 2023:

98.7% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

1.3% of the Sub-Fund's assets were invested in #2 Other.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **In which economic sectors were the investments made?**

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo % PTF
Health Care	21,32%
Technology	17,98%
Financials	15,3%
Industrials	13,85%
Communications	12,22%
Consumer Staples	7,84%
Real Estate	4,38%
Consumer Discretionary	3,03%
Materials	2,79%

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes
 - In fossil gas
 - In nuclear energy
- No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

These investments do not follow minimum environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Joint Engagement Initiatives

- Endorsed the UNPRI Spring Initiative, a TNFD-aligned initiative
- UNPRI Railway agreement

Engagement Example: MillerKnoll

On April 19, 2023, a video went viral (over 24 million views within 2 days) of MLKN CEO Andi Owens’ comment to employees to ‘leave Pity City’ after some asked about staying motivated if employees did not receive bonuses this year. The average MLKN employee receives \$45,000 salary. CEO Andi Owen received a \$1.1 million salary with a \$3.9 million in stock awards and other compensation for fiscal year ending May 2022, according to most recent MLKN proxy statement. The compensation received by MLKN CEO in 2022 is in-line with its peer group. After the viral video, CEO Andi Owen sent an email to staff stating, “I feel terrible that my rallying cry seemed insensitive...What I’d hoped would energize the team to meet a challenge we’ve met many times before landed in a way that I did not intend and for that I am sorry.” MLKN has not yet decided on bonus payouts for staff, including its CEO, as its fiscal year ends in May.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sub-Manager (Scharf Investments) Engagement: In response to remarks MLKN CEO Andi Owen made as a part of an online meeting with workers, Scharf Investments engaged MLKN over the topic of compensation. On April 27, 2023, President and Investment Committee Chairman, Brian Krawez, and Senior Research Associate, Grace Menk, sat down with MLKN CFO, Jeffrey Stutz, and Vice President of Investor Relations, Carola Mengolini, to discuss the circumstances surrounding the CEO's remarks and underlying compensation plans. We learned that Andi has been doing smaller group fireside chats within the company after the video went viral. Managers within the company are also talking to their employees to gauge morale. Scharf Investments engaged with the company on this issue and felt that outreach within the organization was a positive step in the right direction to reengaging employees.

2023 Company Engagement Summary

Company Name	Type	Topic	Date of Engagement	Response or follow-up
U.S. Railway Industry	UNPRI Collaboration	Sick Leave	1/20/2023	
MillerKnoll	Individual	Controversy - Social	5/1/2023	Quarterly engagement
Lockheed Martin	Individual	Controversy - Social	10/9/2023	Followed up, no response.
Samsung	Individual	Controversy - Governance	10/9/2023	Followed up, no response.
U-Haul	Individual	Carbon Emissions	10/9/2023	

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- **How does the reference benchmark differ from a broad market index?**
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- **How did this financial product perform compared with the reference benchmark?**
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- **How did this financial product perform compared with the broad market index?**
Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
